Thread: [Planning to make a simple spoiler app for HF](#)

wiz - November 27, 2019, 8:48 pm

This will help with people doing giveaways / giving a limited number of stuff out / selling accounts.
You will be notified when someone opens your note.
You can set the note to expire per views / time.
App will be free to use!

Let me know what you think!

Human - November 27, 2019, 9:03 pm

Lets say I got a list of giftcards to give out. Will there be a feature so when someones clicks on the link they can only see 1 item.

Basically there will be a switch/button that will allow you to enter one code per line, once you click encrypt, you will get a link for each line.

You can then give the link to the person.

This could easily be bypassed unless OP is able to hook into HF profiles. How expansive is HF's API?

If Omni gives me access to API, I have a much bigger idea ;)

I swore HF had API keys, or used to.

Nothing under docs or settings.

Ravioli - November 27, 2019, 9:11 pm

cool stuff man

good luck

Knew I wasn't trippin. Honestly forgot all about the API. I wish we saw some more uses come out of it.

Linux X - November 27, 2019, 11:20 pm

Looks interesting. I hope the design wont be so bad.

Fugg - November 27, 2019, 11:39 pm

I still am a little confused on the exact use for this. Can you give an example of how a user would be using this?

You're amazing, thank you!

Unexplained - November 28, 2019, 5:43 am

Neat idea..not sure how much it'd be used though?

I wish we saw some more uses come out of it.

They probably stopped developing this since demand was low as fuck.

?

I've requested a dev token and will rework the idea :)
