Thread: [Bustadice Method 92.5% Win Rate \(Script + Strategy\) ONLY \\$20](#)

SIM-990284 - November 28, 2019, 7:36 am

Hello Guys,

So I've spent a while on bustadice and managed to come up with a fairly good strategy that is working very well.

Unlike other scripts and strategies that require huge investments, you can start with any amount using this.

As you can see out of 23,000 Wagers my win rate is 89.2%. Always remember with gambling there is always a risk however if you don't do anything stupid (i.e. go all in) using my method you will profit for sure.

Willing to give 2 vouch copies to high rated users who are willing to test my method (Only ask for a vouch if you are willing to test the method straight away).

Price is \$20 BTC/Paypal NOTE THIS IS STILL GAMBLING SO PLEASE USE IT RESPONSIBLY

Only selling this as it will not affect my profit and also it's not an exploit so will not be patched, also not a script you just leave running.

This is one of the safest Bustadice scripts I've come across. Mostly because this isn't fully automated. You have to manually monitor the script and place bets accordingly. The script determines the right time to place the bets. Mineral was kind enough to explain everything to me in detail. I was able to make 1.5k bits within the first 30 min.s with a bank roll of 3k bits.

I'd definitely recommend checking this out if you're in to gambling ?

(Dec 1, 2019 12:53 PM)Compulsive Wrote: [\[CITE\]](#) Vouch for Mineral.

I purchased the method, and I started the method about 45 minutes ago.

As you can see, I have made \$18.50 profit in that amount of time. I am not sure what the user above me found with this method but I have not had bytes eaten by the script, and it is mostly manual when it comes to other actions. I do not want to post more about the script but it is not always betting for you and there needs to be some input as the user. This will not bankrupt you unless YOU do that yourself and are greedy.

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your product.

Caligio's Review for "[Bustadice Method 92.5% Win Rate \(Script + Strategy\)](#)" by [Mineral](#).

I am going to begin the review by saying two things:

1. I will keep the review rather short, due to the nature of the product.
2. Please remember that gambling is gambling and I highly advise going through the list of these 14 tips, before you even consider buying this product.

Safe Gambling Tips:

Spoiler [\(Click to View\)](#)

1. Set limits on time and money spent.
2. Play for fun, not just for money.
3. Bet only what you can afford to lose.
4. Realize that knowing more won't guarantee a win.
5. Don't play to escape.
6. Know what's legal to play in your area.
7. Never gamble when stressed, depressed, or in recovery.
8. Know when to quit; don't chase your losses.
9. Understand that everyone loses over time.
10. Gamble only with money set aside for entertainment.
11. Avoid mixing gambling with alcohol or other substances.
12. Never borrow to play.
13. Balance recreational gambling with other healthy activities.
14. Know where to get help.

The process of receiving the product happened over Discord, the seller sent me the script alongside with explaining how it works and what you should do. At first, it was a little bit confusing but I managed to quickly get the hang of it.

Based on the whole controversy, I found out that the seller seemed to be sending scripts with a different "safety" level which makes also think that it was rather in testing at the time, but after all. He did mention to me that it was the setting that changes the safety and also advised on the changes you should/could make.

What I personally love, I love watching the process of gambling, so this was rather the perfect thing for me. The script that he sent me was by default set to a really safe setting, and I found it a bit too slow for my liking, that's why I decided to up the risk a little bit. I still followed his initial advice on how to cover loses and. it worked out rather great.

I did advise the seller to make another script, if possible that would automate a process in which you don't profit, but which is needed - unfortunately, it seems like he wasn't able to, so it still stays there as a suggestion.

I invested 30\$ of my money, which was around 3,8k bits (at the time). I played on an off for around 1.5 hours and managed to get a 2.5k bit profit.

You will have to trust my word on that, all of the bets I made were following the steps that the seller-provided me with, the only thing I did was lowering/highering the safety settings every now and then. (Had to add this because of the controversy, also remember that it is gambling after all, so your results will look different.)

Proof:

Spoiler ([Click to View](#))

Final Thoughts

To conclude, I would like to say that I found the script+strategy fun to use because of the fact it's rather safe and you can really control the process, although it's pretty time consuming.

I can't say that I recommend it, but that's only because I find it immoral to recommend gambling to someone.

I would like to once again thank you for giving us "Appraisers" a chance to review your product.

Good luck with the sales! ?

(Dec 3, 2019 07:38 AM)? gHos? ? Wrote: [\[CITE\]](#) I'm leaving an honest review for Mineral. I wanted to say first and foremost, the man is extremely friendly, and considerate to the fact of gambling. He gave me great advice and tips for trying to win, strategies, and a very thorough understanding of the script. Concept of the script was a tad confusing at first, but he answered all my questions I had right away, also walked me through my first bets till I felt comfortable on my own. Which is something I truly appreciated as I felt he cared about the money I put into it.

I would like to add I have made some human errors so far, like 2 miss types that were more then I wanted to put, so I am beginning to work my profits up. You've got to understand it is GAMBLING, but with this method it simply increases your odds ten-fold. Once the script is in, it works very good and you can adjust based upon risk level, which is also reassuring if you have a couple bad bets.

Overall, if you're already planning on gambling, especially with bustadice, this is a no-brainer to amplify your chance of profiting a lot. I can see how this could make you a ton of money on multiple accounts. My advice, be patient, don't play super aggressive especially if you don't have the bankroll to recover. I've got faith most people who get this script can profit daily. I hope you all have a great day, and best of luck!!!! ?

I find this quite a good purchase as you take control of your profits and if you have a solid balance it's pretty hard to go broke, I'd recommend you to have some time on your hands, and to never be impatient. My profits are stable and can be projected to \$15+ per hour depending on hour committed you are

The seller had even put the money that I gave him into it to prove how he did it until I got the whole

concept, that's great service.

It's quite confusing but once you get it, it'll make a lot of sense.

Highly recommend this user overall

can i have a vouch copy?

how many bits we can earn in an hour?

SIM-4086413 - November 28, 2019, 9:50 am

I can review if you want, got funds ready and i'm familiar with bustadice.

I have received a vouch copy and this is my honest in depth review.

READ THIS REVIEW FIRST

I have tested the method for 2 hours straight.

The script is pretty much useless, it is to make certain counts by skipping bets however after xx bets skipped it will bug out and skip 1 bet per 30 seconds and therefore react really really slow making the script completely useless.

I've given OP a fix for this as he claimed that he was the dev of this script.

The fix would have required OP to edit 2 lines and add 1 line of code, he suddenly told me he went out to dinner and he started ignoring me on discord, i know for fact that he was ignoring me cuz he had no issues at all responding and bumping this thread.

I don't appreciate that OP but whatever, i assume he can't code this himself and therefore came with an excuse to stall time.

The method itself.

So i started doing this method manually since the script is useless in this state.

The method itself slowly eats your bits away, i followed exactly what OP told me and i basically lost 200-300 bits, slowly won them, back and then lost them again, this continued for like 4 times... i then applied my own technique to his method and then started winning however if i wouldn't have done that i would have ended up with a LOSS of 700-800 bits within the past 2 hours.

I believe that the method would have eaten my bits away completely overtime if i continued using his method as it would basically be impossible to recover from this huge loss.

Until OP stops ignoring me and updates his script based on my advice, i can definitely NOT VOUCH for this script or the method itself.

At this point i definitely do not recommend buying and the fact that OP increased his pricing is insane in my opinion.

BUSTED - Used safer settings and safer base bet but still busted, this script can not survive big red trains and they happen often

Initial deposit was 3000 bits. Its not a script you keep running. My method requires a person to be there and watching you will understand why later.

Initial deposit doesnt really matter as you can just reduce your base bets. ?

Mineral gave me a vouch copy of this script and this is my honest review of it.

This is one of the safest Bustadice scripts I've come across. Mostly because this isn't fully automated. You have to manually monitor the script and place bets accordingly. The script determines the right time to place the bets. Mineral was kind enough to explain everything to me in detail. I was able to make 1.5k bits within the first 30 min.s with a bankroll of 4k bits.

I'd definitely recommend checking this out if you're into gambling ?

Magaddino didnt even bother to follow what I told him instead he was hell bent on making the process automated. The reason for it not being automated is because human intervention is important to stop you from just busting.

Also you say the script stops , if you followed my instructions you can continue to use the script its not a bug.

Anyways it works if you use it how i say and not try make your own adjustments

2. Altho he is performing the method manually he is also not following the method 100% correctly as delivered, he is doing his own twist to the method just like i did aswell and i also notice a lot of manual betting which is completely irrelevant to the method which is where most of his profits come from.

I'm not sure why [Compulsive](#) is basicly trying to mislead people saying that this method earned him those funds within 45 minutes, that is basicly complete bullsnap.

What earned him those funds is his own twist on the initial method + manual betting completely irrelevant to his method and based on luck.

At least be honest [Compulsive](#) the script is bugged and useless and following OPs method exactly as he delivers eats your bits away slowly.

Doing the twist thst we 2 are now doing is very risky as a red train of 12+ reds will completely bust us out and those happen frequently.

You're entitled to your opinion and I appreciate it but to be honest your just going out of your way to be an ass cause i wouldnt modify the script for you.

But yeah not going to respond to you further so don't waste your breath. More people who actually purchase will be posting proof soon lmao. ?

For some reason you try to make it look as if you needed to change it for me, if you look at my history here on HF you can see that i know how to develop actually, i'm developing my own crypto game afterall.

The script that you deliver is bugged and only works for x minutes.

The method that you deliver, exactly as is will eat bits away slowly or it will play even but it is impossible to win big with it, fast unless people modify the method based on their own finding and even then it isn't that great.

You shouldn't lie to people like that it will cost you your rep and all of that for only a few bucks, grow up kid.

Listen I told you to screenshare so I can walk you through the method. You refused and said you were knowledgeable so I taught you through chat. I have not given you a different method you just never bothered listening entirely. And inviting your fan boys to back you up on my thread is cute. Compulsive paid the full \$50 price and is happy. Your method isn't complicated and even a baboon can fully understand it within seconds, it is based on martingale also it doesn't change the fact that you can't even write a simple code to bypass the skip bet protection which makes your script completely useless to begin with.

Your initial method, if really yours, can not earn money, as i said it will require certain twists which you never mentioned you even advised against those twists and i can post proof of that if you continue lying.

Once certain twists and some luck is applied you will make money, i will not argue with that however what you delivered to me, exactly done as you delivered will never make a soul money.

Update your script, update your method and then i will change my posts as those will not be valid at that point anymore.

Don't change your method and your script, and i will stand behind my review 100% and advise people not to buy it.

But in this state i can not vouch for it, definitely not.

Your so called "twist" is not a twist mate I have taught everyone the different options if you let me walk you through on teamviewer and took more time listening you would have known this.

Secondly nothing to "fix" I will say it again and again this is not meant to be fully automated its a safer way of betting whilst keeping you in control. I understand one part that you want fixed which I will provide a secondary script to my paid customers (I.e. not you)

This is one of the safest Bustadice scripts I've come across. Mostly because this isn't fully automated. You have to manually monitor the script and place bets accordingly. The script determines the right time to place the bets. Mineral was kind enough to explain everything to me in detail. I was able to make 1.5k bits within the first 30 min.s with a bankroll of 4k bits.

I'd definitely recommend checking this out if you're into gambling ?

As you can see, I have made \$18.50 profit in that amount of time. I am not sure what the user above me found with this method but I have not had bytes eaten by the script, and it is mostly manual when it comes to other actions. I do not want to post more about the script but it is not always betting for you and there needs to be some input as the user. This will not bankrupt you unless YOU do that yourself and are greedy.

If anyone has more questions and is still skeptical, you can message me if you want more details. Official Appraiser Caligio is also in process of leaving his review. Non of these guys are my friends lmao you think all these guys are just going to lose their accounts over some dumb shit like this ?

I would like to clear some things up on this thread.

I did purchase the method for full price, along with extra bits since I did not have BTC at the time.

Deposits: 3,474.47 bits

As of right now, using what Mineral told me over TeamViewer, I am at this profit:

I am keeping the link so anyone can follow real-time with what I am doing.

According to this message to Mineral in Discord, this is when the TeamViewer session started.

Which converted to UTC is: 5:57pm UTC.

After being shown on TeamViewer, I posted the thread about my profit at this point (bet #15,130):

This is my bad after looking at exact times, but nonetheless, an hour and some are close enough.

These were my earnings, and this is what I got out of the method. I have found success with it and seeing the controversy on this thread, it seems some have not. You have to remember that this IS GAMBLING and with gambling, there is always a risk involved.

BELOW THIS IS WHAT USER MAGGADINO MESSAGED ME ABOUT ON DISCORD. I am keeping this in a spoiler to detract from my post, but if you would like to see how he is messaging me, a paying customer, INCLUDING TRYING TO GET ME TO CHANGE MY REVIEW BY PUTTING WORDS IN MY MOUTH, you can check that out here

These are messages that show he is trying to get me to change my review, even though I found results with what I received.

These messages are 40 minutes after not replying.

These are messages after showing him that I paid for it in full after accusing me that I was getting some sort of discount, which would be against HF rules for not specifying to me that it was in exchange for a vouch copy, for a review.

There are many more messages where I am insulted for my intelligence, and we did jab at each other in these messages as well. If anyone would like to see more messages, some of which I will not show due to it being about the method. Please start a convo with me or PM me and I will show you.

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your product.

Caligio's Review for "[Bustadice Method 92.5% Win Rate \(Script + Strategy\)](#)" by [Mineral](#).

I am going to begin the review by saying two things:

1. I will keep the review rather short, due to the nature of the product.
2. Please remember that gambling is gambling and I highly advise going through the list of these 14 tips, before you even consider buying this product.

Safe Gambling Tips:

Spoiler ([Click to View](#))

1. Set limits on time and money spent.
2. Play for fun, not just for money.
3. Bet only what you can afford to lose.
4. Realize that knowing more won't guarantee a win.
5. Don't play to escape.
6. Know what's legal to play in your area.
7. Never gamble when stressed, depressed, or in recovery.
8. Know when to quit; don't chase your losses.
9. Understand that everyone loses over time.
10. Gamble only with money set aside for entertainment.
11. Avoid mixing gambling with alcohol or other substances.
12. Never borrow to play.
13. Balance recreational gambling with other healthy activities.
14. Know where to get help.

The process of receiving the product happened over Discord, the seller sent me the script alongside with explaining how it works and what you should do. At first, it was a little bit confusing but I managed to quickly get the hang of it.

Based on the whole controversy, I found out that the seller seemed to be sending scripts with a different "safety" level which makes also think that it was rather in testing at the time, but after all. He did mention to me that it was the setting that changes the safety and also advised on the changes you should/could make.

What I personally love, I love watching the process of gambling, so this was rather the perfect thing for me. The script that he sent me was by default set to a really safe setting, and I found it a bit too slow for my liking, that's why I decided to up the risk a little bit. I still followed his initial advice on how to cover loses and. it worked out rather great.

I did advise the seller to make another script, if possible that would automate a process in which you don't profit, but which is needed - unfortunately, it seems like he wasn't able to, so it still stays there as a suggestion.

I invested 30\$ of my money, which was around 3,8k bits (at the time). I played on an off for around 1.5 hours and managed to get a 2.5k bit profit.

You will have to trust my word on that, all of the bets I made were following the steps that the seller-provided me with, the only thing I did was lowering/highering the safety settings every now and then. (Had to add this because of the controversy, also remember that it is gambling after all, so your results will look different.)

Proof:

Spoiler ([Click to View](#))

Final Thoughts

To conclude, I would like to say that I found the script+strategy fun to use because of the fact it's rather safe and you can really control the process, although it's pretty time consuming.

I can't say that I recommend it, but that's only because I find it immoral to recommend gambling to someone.

I would like to once again thank you for giving us "Appraisers" a chance to review your product.

In terms of adding to the script to automate a part of the method, I am working on this. I did write a script but it worked slower than the manual trick taught in the method. However, once I do find a quicker way I will post and give it to all customers.

As said by Caligio gambling is gambling however if you follow my instructions it is extremely safe and also fun.

? gHos? ? - December 3, 2019, 6:38 am

I'm leaving an honest review for Mineral. I wanted to say first and foremost, the man is extremely friendly, and considerate to the fact of gambling. He gave me great advice and tips for trying to win, strategies, and a very thorough understanding of the script. Concept of the script was a tad confusing at first, but he answered all my questions I had right away, also walked me through my first bets till I felt comfortable on my own. Which is something I truly appreciated as I felt he cared about the money I put into it.

I would like to add I have made some human errors so far, like 2 miss types that were more than I wanted to put, so I am beginning to work my profits up. You've got to understand it is GAMBLING, but with this method it simply increases your odds ten-fold. Once the script is in, it works very good and you can adjust based upon risk level, which is also reassuring if you have a couple bad bets.

Overall, if you're already planning on gambling, especially with bustadice, this is a no-brainer to amplify your chance of profiting a lot. I can see how this could make you a ton of money on multiple accounts. My advice, be patient, don't play super aggressive especially if you don't have the bankroll

to recover. I've got faith most people who get this script can profit daily. I hope you all have a great day, and best of luck!!!! ?

8/10

(Dec 3, 2019 07:38 AM)? gHos? ? Wrote: [\[CITE\]](#) I'm leaving an honest review for Mineral. I wanted to say first and foremost, the man is extremely friendly, and considerate to the fact of gambling. He gave me great advice and tips for trying to win, strategies, and a very thorough understanding of the script. Concept of the script was a tad confusing at first, but he answered all my questions I had right away, also walked me through my first bets till I felt comfortable on my own. Which is something I truly appreciated as I felt he cared about the money I put into it.

I would like to add I have made some human errors so far, like 2 miss types that were more then I wanted to put, so I am beginning to work my profits up. You've got to understand it is GAMBLING, but with this method it simply increases your odds ten-fold. Once the script is in, it works very good and you can adjust based upon risk level, which is also reassuring if you have a couple bad bets.

Overall, if you're already planning on gambling, especially with bustadice, this is a no-brainer to amplify your chance of profiting a lot. I can see how this could make you a ton of money on multiple accounts. My advice, be patient, don't play super aggressive especially if you don't have the bankroll to recover. I've got faith most people who get this script can profit daily. I hope you all have a great day, and best of luck!!!! ?

- ? gHos? ?

Thanks for your honest review. As said by ghost remember this is gambling however with my script you will increase your odds by a lot. You are also in full control with my script!

Unfortunately due to two typos ghost is currently in a loss but im sure he will recoup that as long as he dont make more mistakes ?

I myself have started another fresh account with 3k already in profit

large vouch for this user, guided me completely through the procedure.

I find this quite a good purchase as you take control of your profits and if you have a solid balance it's pretty hard to go broke, I'd recommend you to have some time on your hands, and to never be impatient. My profits are stable

and can be projected to \$15+ per hour
depending on hour committed you are

The seller had even put the money that I gave him into it to prove how he did it until I got the whole
concept, that's great service.

It's quite confusing but once you get it, it'll make a lot of sense.

Highly recommend this user overall

opinion but now you just look outright dumb.

Yes, i used a way safer base bet and a safer entry point.

Instead of skipping bets and bug out the script, i just betted 1 bit at 2 to avoid the script from bugging out.

His method is what busted, when i busted i threw the final 2k bits i had left away.

Got a copy. Here's my review:

It's gambling so there's ALWAYS chance you could bust. Is this script any better? It minimizes the risk a lot and you would want to have a bankroll of \$100+ to earn decent money super safely. Downside to this is you have to bet yourself which just takes too much time.

I have personally busted but i had a small bankroll, i have yet to give a try high bankroll for a safer session.

Should you buy it? If you NEED to make money, no. It's gambling so don't buy it if your sole intention is to make a profit, because it does not guarantee anything.

Though I too ended up busting and didn't make profit with this, but that was very insensitive move to leak the script. Especially when you were sold it at a lower price on request.

It's gambling and risks are assumed. Nobody can guarantee profit. Mineral had some strategy he thought was worth selling and he did so. Many of his customers made money. Few others lost, me included. But that doesn't mean you should leak the stuff. I am sure if would've asked nicely, he would've even refunded you.

Made around \$132 dollars using this today, all from a starting balance of around \$20

Averaging around 50-100\$ a day myself at the moment, get it whilst its cheaper

farrow26 - September 5, 2020, 10:29 am

Interested in discounted copy

Did you mean it's ok to start with 20? And you make 50-100 a day with it?

SIM-990284 - September 7, 2020, 1:41 am

Yes I always tend to start with 20\$ and have around 100\$ in a days work.

Yesterday I bought his method.

I must say: I like it!

I deposited like ~\$50 and went up to ~\$120 in one to two hours.

NICE!

Unfortunately I was getting more greedy because I already lost \$300 in Roulette these days....

So..... the ~\$120

But!, dumb as i am i deposited ~\$40 this morning and I got up to ~\$120 again.

NICE!

Lets make a test how greedy I am today :D

I really recommend this one!

(if you aren't this greedy I am everytime)

Sakhill - September 8, 2020, 6:03 am

Start contract with you, looking for something new :D

About script and method:

Heard about that, work with and it's possible to make some cash, just don't be greedy.

Price of 20\$ is fair for that.

Seller is also nice guy, no hassle at all.

SIM-990284 - September 10, 2020, 12:07 pm

Price is now back up to 20\$! Online now so hit me up

Thanks for responding. Do we need to actually sit and stare at it or is it something we can revisit every 10-15 mins or so? I've never played Bustadice

SIM-990284 - September 17, 2020, 12:41 pm

Price is now 35\$ guys sorry. Pm me I'm online now
