Thread: [Epstein didn't kill himself. \(JFK assassination\)](#)

Mr. Robot - November 30, 2019, 6:36 am

Just watched a video on youtube and this popped up - gave it a google and found another reference from when JFK was shot.

(just to be clear, J Epstein would have only been 10 years old lmao so a different epstein but still)

Youtube video I watched: (7 minutes 36 seconds)

What's even funnier is "Michael Baden" did the autopsy/examination of JFK and Epstein.

All of these things aside, we can still all agree that Epstein didn't kill himself.

I don't even think he's dead. He's probably in the pizzagate basement having an orgy with Clinton & a 10yo.

Like 90% of the shit happening in this world. We actually know nothing...
It's hard to know what's real and what isn't ..
