Thread: [100% FUD service Moneybookers](#)

alibaba5 - August 10, 2010, 7:26 pm

Hi all,

Okay, i decided to use ONLY Moneybookers from now on..
The reason for this is , paypal is limiting my fucking accounts instantly.
I am getting sick and tired of them taking my money every time.
Also, i am sick of people who are paying with stolen pp money.
So from now on,..MONEYBOOKERS.

Sorry all, we all don't want to be ripped, i hope you all understand my situation.

Crypting service

--

i crypt your servers etc etc for \$2 each.
5 servers for \$7,50
Unlimited crypting service for \$15,00 (that means crypting till i die)

Each server will be crypted with an unique stub, i never use a stub for the second time.

If you like i change your icon to any icon you like.

I accept moneybookers ONLY.

1. I do NOT trade for accounts
2. I do NOT go first
3. No beggars, (your mother is assraped, and want a free crypting to find the rapers info??) etc etc, you know what i mean.

Please rate the thread if you feel it helped you!

Cheers all!!!

I use multiple crypters bro, not only Blackout.

Added 1 more payment option for the first 15 customers,PAYPAL.
After the 15 persons, its just moneybookers or alertpay!

So do you have paypal? Contact me again.

I also like the fact that you don't use a stub twice, I think thats nice.
However, I might be going for the "Unlimited crypting service for \$15,00 (that means crypting till your die)" service.

I hope youre not using Blackout AIO to crypt people's files, cause we all know why that went off the market... You didnt specify any details about the service. What crypter are you using? Do you have the right to do a crypting service with this crypter? Is it .NET dependant? Where do you scan the crypted files? How long will the crypted files last? How are you using different stubs on each crypt? Does the crypter have a USG to make unique stubs for each crypt?

I think these should be answered before you continue your service, because this whole thread seems really fishy... ?

1. I do not use Blackout AIO
2. I use private (modded) crypters, so yes i am allowed to do a crypting service.
3. I scan my files at NVT with no distribution and scan4you.
4. I can crypt with and without .net.
5. The crypted files are FUD for weeks, depends at the scans at virustotal etc etc.
6. Yes i have a USG so every customer gets an unique crypting with unique stub.

Any more questions?? ?

Thanks for ing my thread also.

Crypting service is open.
