Thread: [Today was a good day for my BTC wallet and first sale on Shopify!](#)

It started at 0.01 and ended up with 0.06!

I'll be using the profits from today to invest in new methods here!

I got my eye on Deal's trading signal platform but that is a hefty investment of around \$1,500 so got to have a detailed look into it!

\$73 > \$439

Not too shabby plus I spent around \$40 on other stuff through BTC.

And to top it all off I checked my Shopify after a disappointing shoutout result and saw I got a sale, I'm still in the negative around \$40 but still, at least I know it works... Time to ramp it up on FB!

The goal is to move to Bali by next February for anyone who has never been its paradise, bit fed up on China!

I hope you will succeed! China doesn't appeal me at all, but Bali on the other hand does seem like a paradise.

Keep up the good work and you'll send us a regards-card from Bali soon ?
