Thread: [Snapchat Live sending tweak](#)

**bskbida** - December 3, 2019, 6:54 pm

Hello everyone,

Over the last couple months, I have developed a tweak for snapchat. It has similar functions to Snapchat++. You can send live pictures from the gallery, save photos and videos, and view snaps without the other person knowing.

Could be used for e-whoring, thats why I developed it. Works only on jailbroken iDevices. Works on current Snapchat build with no detection.

Purchasing the tweak will give you a link to the file, lifetime updates.

Message me on discord for more information, and for a price. CashApp and Venmo only.

Discord: Astro#8570

OP was more than helpful with the setup. This definitely works and it will definitely be worth your investment. OP seems to be a great guy and his product is just as nice as he is.

This thread is a year old, about the same amount of time the OP was last seen. I doubt you'll get a response. Quit digging graves.
