Thread: [Sportsbook question - bytes pending?](#)

KrazyHigh - December 3, 2019, 7:30 pm

First time I bet bytes on a game and won but don't see any bytes showing up. Still shows under active bets even though the game has been over for a while. Does it just take a while or how's it work?

They are all manually paid out. Takes time.

Really? thats weird

Natas - December 3, 2019, 10:52 pm

I usually get mine a little bit after the game like a few hours but Ive always gotten it within 24 hours just wait a lil while if there is a glitch or bug or something id contact Omni but you most likely will get it soon if you haven't gotten it all ready.

The Admin chooses when to pay out.

Nice to know they're manually sent out. I've been getting mine shortly after so I thought it was automatically paid out.

That seems entirely too tedious

I highly doubt he does each bet manually, I think he just pays out per game all at once.

Cooligan - December 4, 2019, 10:10 am

Just give it time and it will automatically deposit into your Bytes balance.

What time was this game held and what time did it end?
Also what was the game?

I'd imagine the process is automatic... Did they ever say they do it manually per f cking game?!

I am honestly talking out my ass, I have no clue how it works... lol

Lindros - December 4, 2019, 10:50 am

No it just takes some time. I have made a lot of sports books bets.

This isn't true at all, The whole process is done via api, Everything is automated.

You should probably have your bytes by now but I find usually it takes roughly 1-4 hours until I get my bytes.

however if you didnt recieve your bytes by now I'd definitely recommend contacting an admin.
