Thread: [Switch accidentally update 9.1](#)

Pieter De Kreij - *December 5, 2019, 2:41 am*

I just have my hacked switch for a week or so.

By accident I installed the Nintendo update to 9.1 this morning

My switch doesn't do anything, screen is Grey that's it.

Can I downgrade it? I don't have a nand dump.

I've also read you have to wait for a new dump, how long will this take?

Hope you guys can help this noob out
