Thread: [\\$5,000,000 traded and ~ \\$160,000 profit on BitFinex past 30 days](#)

DevNet - December 5, 2019, 3:19 am

Last month I did less than 400k so I am very pleased with this (\$1,000,000 traded and ~ \$40,000 profit on BitFinex past 30 days).

Hoping to scale it up to 5mil this month (december)

Edit 2020-01-14

Have done 4.7m past 30days. Profit margin is slightly less so It's about 160k these past 30.

And yes for those paying attention I did a crazy amount of volume the last 7 days (3m+ in 7 days). Will also start buying op LEO regularly to get better fees.

Seagulls - December 5, 2019, 3:24 am

That's great, but could mean nothing without knowing your profit?

So roughly \$42000 per month? ?

DevNet - December 5, 2019, 3:27 am

(Dec 5, 2019 04:26 AM)Seagulls Wrote: [\[CITE\]](#) So roughly \$42000 per month? ?It's still growing pretty fast, but last month (october) I only did ~2% on 400k ish.

On top of that keep revenue mostly in crypto so it swings heavily.

Lorem Ipsum - December 5, 2019, 6:38 am

Do you trade manually or do you have some kind of automated platform for this?

I used to day-trade Crypto currencies for months, all semi-automated. Decided to stop a few months ago, but seeing this.. it does encourage me to start again!

Congratulations my man, you're officially a great investor and trader!

That's great! I did the same thing, but on a different platform. You had to setup everything from DMA, coin selection up to marges and percentages settings. It's hard to explain for me, because I'm not remembering every term and words haha.

Edited this part below;

It's really my lucky day, OP! First the Dicey award and thanks to this exact post, I got the Green Gift award!

As far as my concern, BitFinex isn't a platform with a build-in automated system. There are websites like; <https://coinrule.io/strategy/automated-trading-bot/bitfinex/bitcoin-btc/> which are basically 'bots' for the trading platforms like BitFinex is this example.

I'm unsure what OP did, but it looks pretty much the same as the day-trading I did in the past. Disclaimer; the website I shared is in no way affiliated with me, nor do I have an account at it. It's simply a result from Google.

Just a quick question. Where would be the best place to learn trading? Did you took any course or how did you start?

Congratulation

Are you running Cryptohopper to automate your Market arbitrage trading

Renestey - April 6, 2020, 12:27 pm

Congrats on those earnings, keep up the grind!

How did you make the \$4 million originally?

He didn't make \$4 million, that's just one month volume of transactions. Not that hard to achieve that amount of volume, but \$160k profit sounds too good to be true.

Anyways if it's true, congratulations, keep going.

Not saying I do not believe you but you have not provided any proof. Sending a gif would be proof. I am an actual trader and you saying that all of this is automated makes me think you are lying.

Lmao you showed nothing. Only volume. 1M in volume is my average position on bitmex. You can open a bitfinex account right now with 10k and have 1M volume in a position alone with 100x leverage. Why not actually gif profit instead of volume?

Its actually so sad that theres no traders in here to call this man out. Dude tried to show his volume of trading to act like its his balance or profit. Search my name up on coinfarm and you can see I have had 1m USD in one position alone.

No leverage, there is no profit counter to GIF lol this isnt some stupid bustabit script or "trading bot" that hf skids sell. I withdraw any surplus and settle

Flash ? - April 10, 2020, 5:42 am

Well sir not to hurt you but people with money can build up the volume XD

Its all about PnL right

Lil Wolf - April 10, 2020, 5:43 am

this is what i most definately need to do XD

"That much volume" isn't even much volume at all. Like again, that is 30 days worth of volume which is basically a average position for me to make. Post a gif of a trading log to actually confirm it and I know you won't cause of the way you sent the gif hiding the volume above.

God you really are stupid aren't you. 5mil at 0,2% is 10k usd in fees.

Not to mention you just joined today, only posted on this thread and have not browsed anywhere else on this forum. Ban evader/double account/troll perhaps?

I can smell your desperation from here

I can smell your desperation from here Calling me stupid when my average position is your 30 day volume. 1M in volume using limit orders is literally \$600 in fees and that is over a whole month. Literally who are you trying to fool. You even messaged me saying you are not a trader. Who ever owns hackforums I hope they have trading knowledge so they can remove this guy. He is definitely going to try to sell something in the future.

In those same messages you saw me only putting market orders buddy. And again, 0 leverage unlike you. I don't need it ?

That's a ridiculous thing to say. You're telling me good traders don't use leverage? You are a joke kid. If all orders are market orders it's still only 2k over a whole month and if you are arbing you are not even risking much or gaining much in the first place. Again, my average position is your whole month of trading volume?

Right click -> Inspect Element -> Edit number -> Screenshot -> post on HF -> Make Ebook -> Take

money.

The evidence you supplied to suggest you actually did that in trades is insufficient, Please try again.

Hoping to scale it up to 5mil this month (december)

Edit 2020-01-14

Have done 4.7m past 30days. Profit margin is slightly less so It's about 160k these past 30.

And yes for those paying attention I did a crazy amount of volume the last 7 days (3m+ in 7 days).
Will also start buying op LEO regularly to get better fees.
Wow thats great, is this a real account or demo?
