Thread: [can i tag mod in threads?](#)

Bulma - December 5, 2019, 8:34 am

hello,

If i have some questions and want to create a thread and add/tag moderator so he could come and answer?

Can i do it and which mod can I tag?

thanks!

Linux X - December 5, 2019, 8:40 am

the tag is @thenamehere@ so here is the example [Bulma](#)

You can start here: [Staff](#)

Drug Problems - December 5, 2019, 10:56 pm

You can view the staff list here

<https://hackforums.net/showstaff.php>

I would suggest not tagging staff in threads instead at the bottom right of every post there is a lightning bolt that is your report post button and the best way to handle things
