Thread: [Blitz Caught Lying \(UID 3705935\)](#)

So he posted a brand new sales thread of a 'private crypto method' and I recognized his proof from another thread, I went to look at his other sales threads and saw the same time he posted his new one, he edited and closed an old one he had. He then INSTANTLY messaged me saying that the proof he posted is brand new proof and is from his new method, he then went back to his OLD thread AGAIN and edited it, so I went back to his old thread, copied the thread URL to google and sure enough there was a cached version, if you view the cached version you can clearly see he used the EXACT same proof on that thread.

<https://gyazo.com/85b911bb2f36d1e93a6e782dcc184282> (His PM asking me to remove the comment and stating it's brand new proof)

<https://gyazo.com/cba2bff9c339a3d96a0596d87d3cdff5> (I pulled the cached version of the old thread and he literally used the EXACT same proof in that thread ages ago.)

The user is shady asf a long time now. Comes up with his new methods every week and reviews from reputable members always are on the way.

Also, I may be wrong but I think he doesnt deliver from the giveaway threads he has done as well.

The user is a complete joke, anyone who falls victim to him, really is asking for it at this point.
