Thread: [How do I edit initial thread post? No option.](#)

Hustla - December 5, 2019, 12:45 pm

Did this option get taken out? I want to edit my first post on a sales thread (change price and title) but I don't see the "edit" option under the post?

Any help is appreciated!

vRWN - December 5, 2019, 12:46 pm

Right bottom corner has an edit button?

[screenshot](#)

Button most to the left.

There is no option for that.

Oh I am sorry, you are right. Might be taken out then...

Cooligan - December 5, 2019, 12:57 pm

What is the original post date of the thread you're trying to edit?

Hustla - December 5, 2019, 1:23 pm

The original date I posted was 11-30-2017, 09:16 PM it's for a sales thread. I wanted to adjust the price and title.

That would be why you can't edit then. I believe they added a time limit to editing old threads, and that once it hits a certain amount of time since the original post date it makes it so you're unable to edit.

Dang, that's unfortunate... it should be an exception for sales thread's and upgraded members. So in times of the holidays we can discount our product.

Oh yeah I hear exactly what you mean, and I'd like to see it as well.

However, I'm not positive behind the reasoning but I can only assume that it had something to do with trying to stop users from editing old sales thread TOS's? Or maybe just the overall price/terms in general to avoid a deal dispute? Not sure, but I would figure it has something to do with that.

Again though, that's just speculation.

You can buy a sales tag or sticky for more edits or be a Vendor for unlimited edits.

Eagle 95 - December 6, 2019, 1:00 am

Your sales thread is not compliant with marketplace policy located [here](#). You don't even have a contract displayed there and linking to autobuy yet you're still bumping it. You should have closed it and made a new one compliant with the policy or purchased extensions (vendor/sticky/tag) so you can edit and again be compliant.

I closed it and granted you a warning. That also raises a question if you're dealing without contracts on your product. You are now subject to closure if Omniscient determines you were doing deals without contracts from your thread.
