Thread: [CoreView - Twitch Viewbot + Raidbot + Channel View Bot](#)

Meterpreter - December 5, 2019, 4:28 pm

Today I am introducing my private program CoreView.

CoreView allows you to raid others with as many raiders as you want. Simply input your Twitch username, the person you want to raid, and the amount you want to raid with. CoreView will then: Join the raid

Count to 10 (New version)

Send the amount you entered in channel views

Start the viewbot

Or, if you do not want to raid someone and simply wish to use the viewbot + channel views, option 2 will instantly send channel views and start the viewbot.

Requires rotating proxies. Proxy options will be supplied.

[Video: <https://vimeo.com/374864861>]

Code Password = CorePass

Price: \$15 - Month. (\$100 lifetime) Will only be selling limited spots.

[contract=tid]Start Contract[/contract]

UPDATE: Have added 3 option to send only channel views, works perfectly

Wouldn't mind checking this out considering I ran FujiViews for quite a while. Any vouch copies for a review?

SIM-3205632 - December 6, 2019, 12:34 am

This requires accounts correct!

No vouch copies as of yet, will consider it though.

Wait if no accounts required how many viewers can I get?

1337GAMER - December 6, 2019, 5:05 am

I assume these raiders/viewbots don't have chat capabilities [Meterpreter](#) ?

Depends on CPU capability. Hundreds to thousands.

Nope because there are no user access tokens used, might add that functionality in the future.
However, I do have a free program I will supply to buyers that steals messages from another channel and sends them in your own stream.

This is brilliant. Can I resell the views or live views? Like in a little thread.

I could make the channel views a separate (third) function if you intended to sell channel views.

As for liveviews, you sure could. I actually thought there would be quite a lot of money in selling bottled services to someone. Operating the viewbot and chatbot in the background to draw in organic viewers, and then slowly reduce bots and replace with organics.

Yah had that same idea for awhile.

Can you stop replying to my thread please. PM me or message me on Discord and wait.

Your comments sound as if my bot does not work and that I don't respond. I respond, and my bot works perfectly fine so long as you give it a rotating proxy like my thread states and actually set up IP whitelisting on your proxy provider so they know it's you....

Dark-Bot - February 3, 2020, 1:15 am

Thanks guy, works perfect

SmartProxy is the most consistent. Proxiware works, not as well though.

Hello there, i may be interested on a near future

?? - March 14, 2020, 9:05 pm

hmm, can you explain your experiences using both SmartProxy and Proxiware paired with CoreView. I am very interested in buying this, but the cost difference between smartproxy and proxiware may be the deciding factor. not sure yet though, this seems awesome, and i fricken loved messing about with the streambot2 software.

Kinja - March 26, 2020, 4:43 pm

is your service still working?

natuip - March 28, 2020, 7:08 pm

what is your discord usser?? cant pm u

desoulen - March 31, 2020, 2:35 am

Is it possible to limit the view count or is it almost random depending on the threads running? Like max. 50 viewers and not higher? How much do I need to pay approx for like 50-100 viewers a month?

Frustsammler - April 23, 2020, 2:51 pm

Pm me please.

Want to buy and try it
