Thread: [PROJECT CLOSED](#)

MTSW - December 6, 2019, 5:21 pm

Time to say goodbye...

Dear friends and customers.

I can't tell you how difficult

is for me to say this. I started with the project a while ago, first private then I came here public. I spend allot time and effort to make this perfect tool. I released a couple of versions and I had pretty many happy customers. When I thought that all is good in my business and life, destiny tells you differently.

I'm here to inform you all that I need to stop this project due to private reasons that occurred suddenly. I'm sorry for all that I can't keep up with supporting this project. I hope u all had a good time and enjoyed my service.

Tomorrow I will wake up in my new life. Its gonna be sad that I cant keep working what I love but that's what I need to do when life forces you.

To all my customers and friends, till the next time (if happen) bye.

MTSW

AMGTech - December 6, 2019, 5:29 pm

is this based on something or coded from scratch ? how many connections have you tested with ?

MTSW - December 6, 2019, 5:32 pm

(Dec 6, 2019 06:29 PM)AMGTech Wrote: [\[CITE\]](#) is this based on something or coded from scratch? how many connections have you tested with ?Both Client and Server are coded from scratch. Both are coded in MASM.

AMGTech - December 6, 2019, 5:33 pm

(Dec 6, 2019 06:32 PM)MTSW Wrote: [\[CITE\]](#) Both Client and Server are coded from scratch. Both are coded in MASM.you offering vouch copies ? pm me need to talk some business ?

Dark-Bot - December 6, 2019, 8:55 pm

I am in need of LAN spread capabilities

MTSW - December 7, 2019, 3:48 am

Yes, we are providing vouch copies but only to high trusted members.
Soon we will add more features, we will have that in mind.

exploit.exe - December 7, 2019, 5:27 am

Hey, this looks interesting are you still doing a 48-hour trial?
What features do you plan to add within the next month?

MTSW - December 7, 2019, 11:23 am

(Dec 7, 2019 06:27 AM)Nanite Wrote: [\[CITE\]](#) Hey, this looks interesting are you still doing a 48-hour

trial?

What features do you plan to add within the next month? Yes, we are still offering a 48-hour trial.

There will be many more, soon we are gonna release list.

Also, we will create a survey so people can post what they want/like so we can create other plugins as well.

fredscott654 - December 7, 2019, 12:32 pm

i would like a test and purchase thanks whats the stub output? and which cryptr goes? looks real solid

MTSW - December 7, 2019, 5:00 pm

(Dec 7, 2019 01:32 PM)fredscott654 Wrote: [\[CITE\]](#) I would like a test and purchase thanks whats the stub output? and which cryptr goes? looks real solid stub output is .exe (native file) .

We didn't tested any of hf crypters with it but we can recommend you few good crypters that's tested with.

PICwarrior381 - December 7, 2019, 7:23 pm

Are you going to add reverse proxy?

Accord - December 7, 2019, 11:06 pm

Disappointed no parallax in the ui but it is clean, good luck with the sale.

Peregrine - December 8, 2019, 2:28 am

65 \$ for one month seems a bit steep. Good luck with sales tho

MTSW - December 8, 2019, 7:25 am

(Dec 7, 2019 08:23 PM)mrpker9 Wrote: [\[CITE\]](#) Are you going to add reverse proxy? Yes, we will add reverse proxy.

(Dec 8, 2019 03:28 AM)Peregrine Wrote: [\[CITE\]](#) 65 \$ for one month seems a bit steep. Good luck with sales tho We offer quality, this rat is coded from scratch which will provide the best runtime results.

XzZ. - December 9, 2019, 8:02 am

Selling price is bit high. Even higher than #. . good luck i don't have such money.

MTSW - December 9, 2019, 9:03 am

(Dec 9, 2019 09:02 AM)XzZ. Wrote: [\[CITE\]](#) The selling price is bit high. Even higher than #. . good luck i don't have such money.

The price is not high if you know what's the difference between this rat and others. # rat is an old heavily used rat that will not give you good runtime results. This one is coded from scratch, new + coded in MASM.U will get the best runtime results I can guarantee this.

sifekama - December 9, 2019, 10:11 am

Contacted you for review before purchase
thanks

kibos - December 9, 2019, 10:41 am

Hi.

Can you give me vouch copy? I am interested in purchasing but first I would like to check it.

Best Regards!

sifekama - December 9, 2019, 10:57 am

i Have alot of Buissines Rating on my Name / and anonymous contract and i'm still waiting his reply on jabber

MTSW - December 9, 2019, 5:12 pm

I will give you 24-hour test so you can check it. Sending you HWID grabber now in pm then reply back with code.

MTSW - December 10, 2019, 6:58 am

(Dec 10, 2019 12:35 AM)M0HX Wrote: [\[CITE\]](#) I'd like a copy if available. will write a review. pm me. No problem, sending you a pm now.

Can This hold 500-1000 connections?

iSevere - December 10, 2019, 11:55 am

(Dec 10, 2019 12:37 PM)Sara Wrote: [\[CITE\]](#) Can This hold 500-1000 connections?

Yea interested on that . What is the max it can hold ?

Also up to how much fps can the remote desktop can get ?

Also why did you guys decided to use assembly for a rat ?

Lastly what is your opinion on the recent Imminent monitor raid ? How do you plan to deal with your clients using your rat for illegal purposes ?

Lextian - December 10, 2019, 8:24 pm

1- Depends on your Internet Connection if your using a 1Gbps i beleive you can hit 10k yet i would advise to domain replicate it with multiple domains 1 goes down move to the other.

2- no idea mstw will tell you.

3- Stable as fuck i tested it its great.....

4- Mstw will advise lol.

rubenbaker31 - December 11, 2019, 3:11 pm

Which crypter is best for it so that we can go for it fast.

chinda steel - December 11, 2019, 3:15 pm

which crypter is best for this Rat?

Watjijwil - December 11, 2019, 3:21 pm

kan je me info in pb geven

MTSW - December 11, 2019, 5:04 pm

(Dec 11, 2019 04:15 PM)chinda steel Wrote: [\[CITE\]](#) which crypter is best for this Rat?Some users have tested it with Broad crypter and reported that it works good.

(Dec 11, 2019 04:49 PM)M0HX Wrote: [\[CITE\]](#) Got a trial and here's my review:

The rat is pretty stable in terms of connection handling/file transfer and commands! Some functionalities are still in development such as "remote desktop". The rat is coded in Assembly/MASM which amazes me! good job:

I had no issues crypting the file with my own native crypter ? :

b4:

<https://scanmybin.net/result/26f4f03936e2be807c4ba69ea8058c8c80b5431815defb08b3da009785ee1726>

after:

the stub size is relatively low: ~120kb without compression! :

Current functions:

- File Manager (Very fast!)
- Keylogger
- Remote View (still in development)
- Password Recovery
- Upload & Exec
- Update
- Disconnect (close)
- Uninstall

overall, pretty nice rat. looking forward to new updates! ?

Thank you for your detail review.

exploit.exe - December 11, 2019, 5:34 pm

Received a vouch copy, this is a very good RAT.

It is native, has on connected task features, and all the features you need in a RAT!

I would rate this 10/10 and would recommend buying it.

mrseptember - December 12, 2019, 12:12 am

you not allowed to give your advice crypte your File and then talk is the best on this forum and other forum and only one coded in MASM

Twistd - December 12, 2019, 6:43 pm

(Dec 12, 2019 05:34 PM)sifekama Wrote: [\[CITE\]](#) you not allowed to give your advice crypte your File and then talk is the best on this forum and other forum and only one coded in MASM

Do you really think it matters that something is coded in assembly, c/c++, vb6, delphi or any other native language for that sake? These people make me cringe. I'm surprised someone goes through the trouble coding a rat with such an ancient language when there are better, faster and easier ways to do it. There's absolutely no benefits from coding your gui c&c using masm, just more unnecessary work for the developer and it means nothing.

I would suggest that u first learn English.

Second ur typical noob who expects that rat is FUD without crypto.

Also, we didn't provide you trial nor you bought our rat so I would suggest you whoever you are to stop posting here. Or come with your real acc and post :)

(Dec 13, 2019 03:06 AM)TheAnon.hf Wrote: [\[CITE\]](#) Parallax RAT(IS IT ONE OF THE BEST?)
Vouch for ma boy MTSW, RAT seems stable, no problems with setup, it has a standard procedure setup, so Ports, DNS and Firewall,
it's 100% reliable it can handle long sessions without any problems, gotta say this is the only RAT I've ever seen made in MASM and I am pretty sure this will be UD for a long time, I suggest adding a small crypter to the pack just for an extra safety, I can say this RAT is one of the best in the market, the real question is: "Can it compete with Warzone?", I'd say yes but they still need to add more features like the chance to execute.VBS scripts would be good, and LAN Spreading so far this can be the best without a problem, just keep working on it, this is an example of the UI:

Maybe add a DarkMode Aswell!

Summary

Product Rating 9/10

Could Be Added: VBS remote execution, LAN Spreading, Persistance!

Strenght Points: Native, UD, Stable, Simple To Setup, NiceUI, Noob Friendly, BUG Report Section, Suggestions Section, Password Recovery System, AUTO-Task, UPX Compression, Keylogger, Configuration System, Remote Download System

That was my review just to end this i am gonna that i'd prefer parallax to most of the other RATs on the market and it's worth all the money you are gonna spend on it! GLWS

-Have a lovely day TheAnon!

you are 100% right mate, it's not in which language you code it in, it's how well you've done it!
Thank you for your review.

First, off al, features doesn't mean anything if ur core is not stable or if half features are not working.
U should test as well our runtime and compare it to others. Crypt it and test,we are runtime undetectable if using proper crypt.

Soon we will add one by one feature,at the moment our main priority is stability which we got.

Nassief2018 - December 13, 2019, 3:11 pm

I'm interested in this RAT but i'm unable to PM yet. Can you send me a message and ask some questions regarding this lovely RAT has i'm ready to buy ASAP.

I await your soonest reply.

iSevere - December 14, 2019, 3:07 am

Parallax RAT had been developed by a professional team and its fully coded in MASM.
Its created to be best in remote administration. Parallax RAT will provide you all you need.
Suitable for professionals and as well for beginners.

First and most important we offer 99% reliability when it comes to stability.

Parallax was designed to give the user a real multithreaded performance, blazing fast speed and lightweight deployment to your computers with very little resource consumption.

We are a group of developers and we are here to offer quality service.

nice rat which one more service proved
send me telegram id
-Parallax Team, join now!

Parallax Summary.

- Client and Server coded in MASM

- 99% Reliability when it comes to stability

- It can either run in Single or Multi-threaded.

This varies on your host machine. The better specs the more efficient it runs.

- Fast Password Recoveries

(Firefox x64 x86, Chrome, Thunderbird, Outlook and more will be added)

- Multi-Port support.

- Lightweight and Blazing Fast!

With little to 0 resource usage. It feels like it was never installed.

- Remote View Desktop capabilities.

- Robust Connection and 100% Encrypted.

Peace of mind knowing that your connections are Secured.

- Support from WinXp to Win10

(x86 and x64)

- Fast Upload and Execute with Confirmation.

- Multithreaded! Control one or more connection Simultaneously.

- File manager: Experienced the best file manager experience in your life.

Snappy, fast with the ability to resume partial download where they left off.

- Auto Task Capabilities and also can manage whichever goes first or last.

- Report a Bug in the Client itself

- Add Suggestion / Features in the Client itself.

- If you have other concerns you may also Submit Other concerns in the Client itself.

- This is just start and more features will be added soon!

Change Log.

Spoiler ([Click to View](#))1.0.3

- Password recovery bug fixed if multiple users were selected.

- Fixed memory leak on Server.exe Remote desktop.

- Fixed labels background color on Builder -> Connections.

- Fixed UPX bug where it does not compress on some OS.

- AutoTasks now auto Save/Load settings.

- HWID keeps changing on special OS's bug fixed.

- It is now possible to use 0.1 intervals for the Remote View. Though not recommended.

- Statusbar now shows which ports are in listening status. The maximum display is 10 ports.

- Password recovery now shows the total passwords of all clients.

- Builder -> Installation file name now no needs ".exe" file extension.

- Mutex name now randomized if no profile is found.

[+] Added Exception handler window. Not all functions have an Exception handler yet.

1.0.2

- Password recovery bug fixed if multiple users were selected*.
- Fixed Mozilla Thunderbird bug where it gets stuck if recovered more than once. (Server has to be updated)
- The serial has changed. The case where it changes if VPN is on is not a bug but it should not change anymore.

*The password recovery concurrency is hardcoded to 5 clients. This value cannot be changed at the moment.

The rest clients will be queued to be completed at another time once the current concurrency value drops below the maximum.

Please note that this software at its early stages. So don't freak out if you find something that doesn't work as expected.

Most bugs happen because the coder did not test the same settings/environment as you did. You should report any bugs/issues to be fixed.

You need to be more specific about what you exactly faced. Things like "it crashes" does not help track down the issue.

1.0.1

- Password recovery update to support Mozilla Thunderbird.
- Fixed few bugs on the server receives.
- Bug fixed if the Password profile folder does not exist.

1.0.0

- Initial release.

Price.

- We are currently accepting only crypto (BTC,ETH,XMR,XRP and others) as payment.
- We offer 2 packages.
- 1 month = 65 \$
- 3 months = 175 \$

Contact Information.

PM me here on HF

or

add me on XMPP: mtsw@jabber.ru < main contact

support number 2 - XMPP: privatesales@xmpp.jp

NOTE:

1. We are selling you a product after payment download link will be sent to you with all files including an explanation of how to set it up (it's easy). We are offering normal support to help you. If you still need extra help that requires port forwarding and explaining everything in detail over team viewer we can do this but this will be extra charged.

2. We offer as well other services, contact for more information.

3.All sales are final

MTSW - December 18, 2019, 9:38 pm

New update released.

Note : After u download a new update u must run a new serial gen to grab hwid. Copy it and just send it trough rat "bug report" or send me a pm here.

If I'm not online and if I don't update u immediately u can still use the old version.Thank you for understanding.

Change Log.

1.0.4

[*]Fixed Keylogger stuck on "Cancelling..." (Requires new server build 1.0.4).

This happens only if the remote peer has slow connection and you have closed the Keylogger window while there is still pending data receiving. (Client/Server).

Note that you must wait for "Cancelling" to finish.

This is basically discarding all data and starting over again.

[*]Fixed bug that leads to crash on Remote view if cancelled and opened quick under some circumstances.(Server)

[*]Remote view capture function has been moved to another thread from the pool instead of the Main thread. (Server)

[*]Fixed error on listening ports stop then start does not show as listening on Status bar.

[*]Issue with serial keeps changing under some machines with Virtual hardware is fixed.

[+] Added Sort Listview on Column clicks (Main connection/File manager/Transfer)

Does not work properly on file size yet. Will be solved in next release.

[*]Better way of saving passwords. Note that on Password recovery's window, it auto saves passwords under PR\Saved Passwords\USERNAME @ COMPUTERNAME-HOSTID.txt.

[*]Bug fixed on loading connection passwords.

[*]System Uptime bug fixed where it doesn't show correct time. (Requires new server build 1.0.4).

Note: Yes, I am already working on new features.

Remote CMD, Process Manager,more browsers/other applications recovery, and some other stuff. It takes time to add new features as bugs showing up and everything is being built from scratch.

ten people will crack it like nanocroe , also wat oter rats give free trail ? ? ? ? ? ? ? ?

magichack3r - January 13, 2020, 7:45 pm

(Jan 13, 2020 02:33 PM)Celiform Wrote: [\[CITE\]](#) ten people will crack it like nanocroe , also wat oter rats give free trail ? ? ? ? ? ? ? ?

Nadien Breaks Nothing

MTSW - January 14, 2020, 8:40 am

New update is out.

1.0.5

[!] Bug fixed that causes Password recovery to crash sometimes. (Client)

[!] Connection's password bug fixed where it does not enter the correct key.

[!] Fixed a bug where the server does not connect back if a write on disk fails.

[*]List view sorting now supports file size and file date.
[*]Thread contention improvement. Now the contention among threads is lower.
[*]Unicode support improvement.
[*]Improved socket's receiving execution time.
[+] Added Command line. Fully multi-threaded, non blocking mode.
[+] Added Process manager. (Red item in List view is the server's process)
[+] Password recovery: Added Opera browser recovery. (Only new versions).
[+] Password recovery: Added Brave browser recovery.

Note:

Command-line is asynchronous operation. This means that you can send commands while still receiving data from a previously issued command. The only limitation is that you cannot send a command while the previous command is still in sending status. The reason is that there is no reliable way to tell where the end of data is.

You could send multiple commands even if the previously sent command is still in receiving status.

Password recovery new browsers are backward compatible. This means that you can still issue a password recovery command from Client with 1.0.5 version to a server with a lower version. However, you will not get Opera/Brave browser's passwords.

bounce16 - January 15, 2020, 4:41 am

hello i want to ask if this rat needs a crypter

NERO - January 15, 2020, 8:41 am

We will add more Antiviruses soon.

Parallax RAT had been developed by a professional team and its fully coded in MASM.
Its created to be best in remote administration. Parallax RAT will provide you all you need.
Suitable for professionals and as well for beginners.

First and most important we offer 99% reliability when it comes to stability.

Parallax was designed to give the user a real multithreaded performance, blazing fast speed and lightweight deployment to your computers with very little resource consumption.

We are a group of developers and we are here to offer quality service.

-Parallax Team, join now!

Parallax Summary.

- Client and Server coded in MASM

- 99% Reliability when it comes to stability

- It can either run in Single or Multi-threaded.

This varies on your host machine. The better specs the more efficient it runs.

- Fast Password Recoveries

(Firefox x64 x86, Chrome, Thunderbird, Outlook and more will be added)

- Multi-Port support.

- Lightweight and Blazing Fast!

With little to 0 resource usage. It feels like it was never installed.

- Remote View Desktop capabilities.

- Robust Connection and 100% Encrypted.

Peace of mind knowing that your connections are Secured.

- Support from WinXp to Win10

(x86 and x64)

- Fast Upload and Execute with Confirmation.

- Multithreaded! Control one or more connection Simultaneously.

- File manager: Experienced the best file manager experience in your life.

Snappy, fast with the ability to resume partial download where they left off.

- Auto Task Capabilities and also can manage whichever goes first or last.
- Report a Bug in the Client itself
- Add Suggestion / Features in the Client itself.
- If you have other concerns you may also Submit Other concerns in the Client itself.
- This is just start and more features will be added soon!

Change Log.

Spoiler ([Click to View](#))1.0.3

- Password recovery bug fixed if multiple users were selected.
 - Fixed memory leak on Server.exe Remote desktop.
 - Fixed labels background color on Builder -> Connections.
 - Fixed UPX bug where it does not compress on some OS.
 - AutoTasks now auto Save/Load settings.
 - HWID keeps changing on special OS's bug fixed.
 - It is now possible to use 0.1 intervals for the Remote View. Though not recommended.
 - Statusbar now shows which ports are in listening status. The maximum display is 10 ports.
 - Password recovery now shows the total passwords of all clients.
 - Builder -> Installation file name now no needs ".exe" file extension.
 - Mutex name now randomized if no profile is found.
- [+] Added Exception handler window. Not all functions have an Exception handler yet.

1.0.2

- Password recovery bug fixed if multiple users were selected*.
- Fixed Mozilla Thunderbird bug where it gets stuck if recovered more than once. (Server has to be updated)
- The serial has changed. The case where it changes if VPN is on is not a bug but it should not change anymore.

*The password recovery concurrency is hardcoded to 5 clients. This value cannot be changed at the moment.

The rest clients will be queued to be completed at another time once the current concurrency value drops below the maximum.

Please note that this software at its early stages. So don't freak out if you find something that doesn't work as expected.

Most bugs happen because the coder did not test the same settings/environment as you did. You should report any bugs/issues to be fixed.

You need to be more specific about what you exactly faced. Things like "it crashes" does not help track down the issue.

1.0.1

- Password recovery update to support Mozilla Thunderbird.
- Fixed few bugs on the server receives.
- Bug fixed if the Password profile folder does not exist.

1.0.0

- Initial release.

Do you have a program to encrypt it? Or do you recommend any encrypt program?

chalaji080 - February 10, 2020, 9:18 am

This is an amazing RAT. Vouch for it. Support is great

jeff37320 - February 10, 2020, 9:50 pm

Very good and fast support !

mrseptember - February 11, 2020, 12:27 am

fast support

users discord channel?

Ramin Bazghandi - February 12, 2020, 2:56 pm

Hi

Any recommended crypter with binding capability!?

ajeelb - February 13, 2020, 10:41 pm

Great RAT
hummm coded in ASM

n0\$f3ratu\$ - February 14, 2020, 5:28 am

This rat is a BEAST.
Tested with my crypter and is bypassing windows defender and avast.
(That is all I had to test on).
I managed to test only because one of my customers purchase it.
GLWS mate.
This rat is really good.

chinda steel - February 14, 2020, 10:59 am

I want to test the rat but price is a bit high

twistednerd - February 17, 2020, 12:07 am

Hello,I'd like to purchase the parallax rat. how do I get it?

i'mCasaNova - February 17, 2020, 10:22 am

i Just purchased second time Parallax RAT is the most stable rat and password recovery etc just amazing if anyone looking for the Best i suggest only Parallax Big Vouch and GLWS.

office123 - February 17, 2020, 3:52 pm

how can i get this rat... and which crypter i can work with

Pheramone - February 18, 2020, 4:11 am

I bought it yesterday. And I am impressed with the functionality! The author is often online and answers all your questions. I advise!

kklover - February 18, 2020, 4:26 am

What email clients does your password recovery support?

MTSW - February 18, 2020, 11:29 am

(Feb 17, 2020 11:22 AM)i'mCasaNova Wrote: [\[CITE\]](#) i Just purchased second time Parallax RAT is the most stable rat and password recovery etc just amazing if anyone looking for the Best i suggest only Parallax Big Vouch and GLWS.Thank you for your honest review.

(Feb 18, 2020 05:26 AM)kklover Wrote: [\[CITE\]](#) What email clients does your password recovery

support?

At moment it recovers Outlook and thunderbird.

In the next update that is coming, we are adding a few more.

Also, we are working together with customers and adding what they need.

Astonished - February 22, 2020, 2:30 pm

Just posting because I'm curious to see if you knew you have now made it onto bleepingcomputer lol

<https://www.bleepingcomputer.com/news/security/parallax-rat-common-malware-payload-after-hacker-forums-promotion/>

Maybe you already know, in which, ignore me :)

Stanley - February 26, 2020, 7:32 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

magichack3r - February 27, 2020, 6:17 pm

Look at the contract I started, I need the BTC address for payment. Recommendation, maybe it would be good to add a AUTOBUY.

MTSW - February 29, 2020, 7:11 am

NEW UPDATE RELEASED.

1.0.6

[!] Bug fixed in password recovery if more than 5 clients selected.

[!] Bug fixed on builder if build more than once.

[!] Remote view bug fixed that causes to give incorrect resolution if higher than 100% DPI is set.

[!] Remote view fixed small drawing bug.

[!] Remote CMD bug fixed on right click.

[!] Process manager bug fixed that shows wrong OS Architecture and file path.

[!] Bug fixed on Password recovery if upload and executed a file, it does not grab passwords anymore.

[-] Removed Mutex's prefix "PX-" on Mutex randomization.

[*] Authorization form is now compatible with new Windows 10 "System Enhanced" DPI setting.

[*] Changed default port. Note that you don't have to use this port.

[*] Some changes in Remote view Form resizing depending on the remote's resolution.

[+] Domain lookup has been added.

Note that this is merely an improvement update. New features are not yet included in this update

but it is currently in the working.

Avatconcept - March 3, 2020, 1:22 am

i think i will try this, good recommendations

andflopez123 - March 3, 2020, 7:27 am

hi Flacon i need nucleus crypter

drewkasp - March 4, 2020, 6:30 am

Interested in making purchase

mrseptember - March 5, 2020, 5:59 pm

i Just purchased

I suggest only Parallax

ping010101 - March 6, 2020, 1:31 pm

Can i get any 1 day trial please !! thanks

mal_hunter - March 10, 2020, 10:35 am

Hi

Can I get a quick trail for couple of days or a week ? I am interested in buying it but want to check it out before I buy. Possible ?

Thanks.

jackbaur57 - March 10, 2020, 1:41 pm

Commenting to come back and get it . Hope it is Unicode ?

archangel777 - March 10, 2020, 3:11 pm

I noticed members who ask you this particular question i am about to ask you don't usually get a response from you and am beginning to wonder why as it is seeming deliberate. Question is, does this product have anyone of these features or are you intending to have them soon, please respond:

HVNC

Hidden RDP

Reverse Proxy

Hidden Browser

MTSW - March 10, 2020, 4:43 pm

(Mar 10, 2020 10:35 AM)mal_hunter Wrote: [\[CITE\]](#) Hi

HVNC

Hidden RDP

Reverse Proxy

Hidden BrowserNo at the moment we don't have HVNC included in RAT but we have to sell it separately to offer to interested customers.

I'm thinking maybe to add it like plugin in the future.

Reverse proxy not yet.

And no hidden browser.

eternal101 - March 12, 2020, 9:54 am

Please what is your discord handle or channel? Also does the Remote View support multiple displays on the remote client?

kompass22 - March 13, 2020, 10:26 am

Does this RAT has been updated for the latest chrome encryption?

kompass22 - March 16, 2020, 4:48 am

Thanks for the reply. I will definitely not consider on buying this product since you don't reply on your own thread.

I can just imagine how fast is your support. Cheers

MTSW - March 16, 2020, 5:17 am

Update Outlook Email Client recovery as well...

Have you heard of AVG browser?

Longdog - March 24, 2020, 3:36 am

Keep me posted on those HiddenVNC and reverse proxy plugins, very interested.

MTSW - March 25, 2020, 2:19 pm

I have to offer HVNC standalone apart from RAT.

All who are interested in purchasing contact me.It's working with the latest chrome, firefox, opera and brave.

I'm giving team viewer proof for all interested in purchasing. Contact me for pricing.

taapy - March 25, 2020, 5:03 pm

id liek to have a trial please

Morziq2 - March 26, 2020, 6:13 am

This seems pretty interesting

generalbukali - March 26, 2020, 4:10 pm

interesting product i come back later here

jackbaur57 - March 27, 2020, 2:04 pm

I will add you now so that we talk about the hvnc and the rat . Thank you .

mrseptember - March 27, 2020, 6:34 pm

I suggest only Parallax

fast and friendly support

Both client and server in MASM.

The rat is pretty stable in terms of connection handling/file transfer and commands!
The rat is coded in Assembly/MASM
good job MTSW

archangel777 - March 28, 2020, 1:52 am

I see you haven't been online for 2 days, please kindly check your PM and reply

Bro you came few hours ago, how come you didn't use the opportunity to respond to some of the concerns here or even read your private message and respond to them ?I am sure the was a reason you logged in here, Please answer my private PM

Apart from buying this RAT, I might be also interested in the HVNC if I like what I see, please once again kindly respond, its easier to book an Appointment and have audience with the queen of England than getting you to respond to your messages and talk to your customers, wow!!!

MTSW - March 29, 2020, 2:02 pm

Good point

Olechizu - April 1, 2020, 4:29 am

Am more particular about stability and recovery. Stability has been taking care of as vouched by other users.

On recovery:

Does this rat have a working auto password recovery?

Apart from chrome, mozzila, outlook mentioned above, can this crypter recover other browsers like :

Qq browser

Microsoft edge

Chrome 80

Opera

Uc web etc

davewest5050 - April 1, 2020, 5:32 am

need ur service . cant add uon discord says not found

MTSW - April 1, 2020, 12:13 pm

Chrome,opera,mozzila,no qq browser,no uc web and no edge.

almightyjojo - April 2, 2020, 3:58 pm

UAC bypass would make this rat 10/10

cyberxyz - April 2, 2020, 4:22 pm

VERY HELPFUL TOOL, COULD YOU SEND A CONTRACT WOULD LIKE TO PURCHASE I AM VERY INTERESTED

zeroxzero - April 2, 2020, 5:24 pm

The new version of Chrome updated and encrypted the stored passwords. Can Parallax recover passwords in the latest version of Chrome?

Kabir - April 2, 2020, 11:17 pm

looks good i see all features except reverse proxy must add reverse proxy for that price /

Ranker - April 3, 2020, 1:40 pm

Anyway to get the few hours trial?

mrseptember - April 4, 2020, 12:02 am

I suggest only Parallax

just do it if you want

mtcoode55 - April 4, 2020, 6:09 am

Bro, i'm still waiting for you to deliver the tool, payment was made more 24 hrs ago

hamal.anuari - April 4, 2020, 8:03 am

How can i buy this product?

zakkary - April 6, 2020, 8:27 pm

i'm looking for a trail run, is this possible?

MTSW - April 7, 2020, 4:53 am

(Apr 6, 2020 08:27 PM)SIM-4063499 Wrote: [\[CITE\]](#) i'm looking for a trail run, is this possible?
No more trials I offer. Product is running already few months and u can check feedback.

SIM-2778735 - April 7, 2020, 4:13 pm

Why is this rat more expensive than other on the market? What make this RAT different? is this rat detected by windows deffender?
Looking forward to buy this product....

MTSW - April 8, 2020, 7:37 am

NEW UPDATE RELEASED 1.0.7

Client:

[!] Much improvements on the Key logger.

Due to this big change, older Servers are no longer compatible.

[!] Key logger now automatically downloads the key logs on the opening of the window. 0 byte key logs are always skipped.

For an up to date key log, use Reload key logs option.

Key log name with bold font is the current key log. Therefore, it cannot be deleted.

The download of key logs will automatically resume (behind the scenes) from how much it downloaded. Online key logger will be added.

[!] Key logger improvements on deletion of key logs.

[!] Key logger now uses a bigger font.

[!] Key logger now uses Word-wrap.

[!] Key logger view key log is now using the local downloaded key log instead of remote one.

[!] Key logger changed the minimum window's rectangle to a smaller one.

[-] Removed Key logger filter.

[*] Bug fixed on connection passwords where it reads wrong password sometimes.

[!] Password recovery: bug fixed on Firefox/Thunderbird where it crashes client sometimes.

[!] Password recovery: The junk passwords on Google chrome browser is not a bug.

This is new Chrome V80+ encryption. Currently, it is not supported so it is skipped for now.

WARNING: Do not use password recovery on a server lower than 1.0.7.

[!] Password recovery: fixed a bug on Outlook if grabbed more than once.

[*] Password recovery: changes in the way of window closure when there is data coming in.

[!] Password recovery: fixed a bug that leads to crash if a user in list has disconnected.

[+] Password Manager: Added Number of processes.

[!] Password Manager: Fixed PID column sorting bug.

[!] Remote command-line bug fixed on input command if a long command is entered.

[+] Added options to use upload and execute name. Random, source file name or a custom name.

Beware that no need for extension if a custom name is used.

It will use the source's file extension name automatically.

[+] Added options to specify how many concurrent upload and execute.

This option is not "per user". Per user is always 1 slot and cannot be changed.

This option will take effect either on the beginning of uploading or after a user upload completes.

Not instantaneously.

[*] Upload and execute now better handles window closure when there is a data going.

[*] Upload and execute: Upload speed improved.

Beware that Upload and execute is no longer compatible with older servers.

[+] Added events log. Currently, only connections and disconnections are added.

[*] Auto task: fixed a bug when there is a burst of connections.

Server:

[!] Password recovery: fixed a bug on Outlook where it grabs "?????" as username.

[!] Password recovery: better method of stopping when grabbing is interrupted in the middle.

[*] Key logger: changes in key log name. Time is now replaced with a counter.

[!] Key logger: bug fixed on key log name if multiple servers running.

[!] Key logger: fixed data race if multi-threaded is selected where it leads the socket sending to stop if multiple functions are being used simultaneously.

[!] Bug fixed on settings storage where it crashes if domains and IPs are specified.

[*] Changes in the maximum number of retry if a domain/ip is dead. Now it is 2 retries before it moves to the next domain/ip.

[!] Fixed ESET detection on connection.

[*] File size has been reduced.

Note: Yes, the requested features will be added.

The priority is always bug fixes/improvements.

This is to avoid making it hard to trace errors.

Thanks for your patience.

s??l?s? - April 8, 2020, 5:46 pm

what i see is owner should reconsider the price.

For a rat this seems overpriced.

MTSW - April 9, 2020, 6:38 am

Does this have Ring3 Rootkit?

Can you add shortcut to popular locations in file manager? desktop, my documents etc

MTSW - April 24, 2020, 12:27 pm

Can you add shortcut to popular locations in file manager? desktop, my documents etcNo, it does not have ring3 rootkit. That raise runtime issues with some AV's.
And yes can be done.

SIM-3888108 - April 24, 2020, 1:04 pm

I have one interesting option in RAT. Its features request. My customers request features , so at end of the month i check which feature has most requests and i do those. As i check which have biggest priority so i put it in the top off list. Sure i can do that but 1 u are not my customer, so not my priority.2.Not many requested nice-looking keyloger.3.Yes, i can do custom works but it will cost you.

Kpajie - April 27, 2020, 1:05 pm

Not having reverse proxy is the only reason I've not considered getting this RAT.

todeajr - April 27, 2020, 4:10 pm

I'm interested in purchasing your RAT. hvnc?

SIM-4122915 - April 27, 2020, 5:14 pm

Telegram id send me i am interest

The reverse proxy will be added in the next update. Already a few customers requested it. Also, i have now to offer HVNC which is far better than any reverse proxy.

Contact me on jabber or discord if you want to see hvnc proof.

(Apr 27, 2020 05:14 PM)mansab337 Wrote: [\[CITE\]](#) Telegram id send me i am interest
I dont use telegram.Only jabber,discord or skype.

gangshiit - April 30, 2020, 10:51 pm

really intrested! how much extra for full tutoring? I'm very new and want 1 on 1 support

alseidba - May 1, 2020, 7:38 am

Does the rat have foxmail client recovery? I can't find you on discord, how can i purchase your product?

diabloteam - May 4, 2020, 4:52 am

I tried to write to you on jabber but I haven't had any answer for 3 days :D

siri - May 4, 2020, 5:40 am

Do you provide 24x7 support, I would like to buy. i will start contract with you soon

nCuX0 - May 4, 2020, 6:06 am

(May 4, 2020 05:40 AM)siri Wrote: [\[CITE\]](#) Do you provide 24x7 support, I would like to buy. i will start contract with you soon!i'm online mostly half-day, and when I'm off I have my support online. So yes I can say u can contact us at any time.

SIM-3888108 - May 4, 2020, 11:39 pm

Please update first page with changelog.

Can you make a screenlogger? Take screenshots on a defined time interval, or when the monitored user enters specified applications, windows or webpages. Can detect images/colour pixel then take screenshot.

Can you add

https://www.nirsoft.net/utis/my_last_search.html
https://www.nirsoft.net/utis/browsing_history_view.html

https://www.nirsoft.net/utis/my_last_search.html
https://www.nirsoft.net/utis/browsing_history_view.htmlIt's updated.

I'm adding all features requested first by customers than by others.
About ur request. There is already screenshot with interval.

And no I'm not planing to add nirsoft. Why would i add 3rdparty app that is detected by some av. All my plugins are custom coded. So no need to add something else.

amondate - May 6, 2020, 8:19 pm

hi,
i need to buy this ... please pm me !

imad13 - May 7, 2020, 7:37 am

i don't have any money can i have it please

killacam007700 - May 7, 2020, 11:56 am

is paypal an option here?

sasllc8384 - May 10, 2020, 10:23 pm

Before I purchase, I would like to know which crypter works fine with PARALLAX RAT?

MTSW - May 11, 2020, 5:32 am

(May 10, 2020 10:23 PM)sasllc8384 Wrote: [\[CITE\]](#) Before I purchase, I would like to know which crypter works fine with PARALLAX RAT? Mostly all native crypters should work with parallax. If people want real crypter that bypasses all av then I recommend broad crypter.

NERO - May 20, 2020, 7:42 am

Gotta love broad crypter <3

Im gonna hit you up for your rat,

MTSW - May 22, 2020, 4:02 pm

Time to say goodbye...

Dear friends and customers.

I can't tell you how difficult

is for me to say this. I started with the project a while ago, first private then I came here public. I spend allot time and effort to make this perfect tool. I released a couple of versions and I had pretty many happy customers. When I thought that all is good in my business and life, destiny tells you differently.

I'm here to inform you all that I need to stop this project due to private reasons that occurred suddenly. I'm sorry for all that I can't keep up with supporting this project. I hope u all had a good time and enjoyed my service.

Tomorrow I will wake up in my new life. Its gonna be sad that I cant keep working what I love but that's what I need to do when life forces you.

To all my customers and friends, till the next time (if happen) bye.

MTSW
