User is most likely compromised and trying to scam EVERYONE.

DO NOT DEAL WITH THIS USER, email was last changed yesterday and 2FA was off.

User has two open disputes, almost scammed a third but I managed to intervene. Hopefully he is closed ASAP!

I just hit him up earlier looking to get his rates and he was trying to get me to buy some today. Close one.

the email being changed yesterday is a big red flag, as well as the fact he tried to scam someone out of \$20 earlier...

I didn't even look at email. Super sketchy right there. Probably a sold account.

Thank you for the heads up. Was considering exchanging with him.

either sold or hacked, a few accounts have been used to scam out recently. hopefully to be an uber member it is required to have 2fa on soon. omni said he had plans to add this for vendors, but a lot of members will instantly trust an uber too...

Yeah forced 2FA would be nice. Surprised it isn't a thing for vendors already.

He's reading this thread and looking at his trust scan ?

It looks like the account was sold since the password wasn't reset as well or maybe it's staged to be

compromised.

a third dispute has been opened, I REPEAT DO NOT DEAL WITH THE USER!!
