I've never personally used the following but they are supposed non-distributing services.

Kleen Scan: <https://www.kleenscan.com/index>

Scan Labs: <http://scanlabs.net/>

Feel free to check them out and add them to the list if you'd like!

I don't know, maybe just the fact that your sample will be distributed to AV vendors for analysis...

Based on OPs assessment they seem to do.

I would suggest adding Kleenscan to the trusted list as they don't distribute in my experience.

Would not recommend Nodistribute, use another scanner to keep your file FUD.
