20 euro/week or 50 euro/month.

Steal? It's the medium market price, there are cheats that costs the double.

Probably you're used to cheap cheats?

There's only 2 things I hate about this cheat,
It snaps to targets and traces behind walls.
and It causes hella lag.

For detection, I've played a whole day and to this day am not banned after raging that one day.
Now I'm using private cheats, but GLWS
Worth the buy if u can tweak the settings to avoid snaps + have a top spec pc for no lag
