Thread: [WTS Game Accounts Resaling 3k A Month \[Wow , lol , dota 2 , fortnite , rs, steam \]](#)

Savager - December 10, 2019, 4:35 am

Hello i have a proposal for someone willing to make a lot of money. I have a method to acquire 3-5 gaming accounts daily including : world of warcraft , dota 2 , summoners war sky arena , league of legends , fate grand order , steam , overwatch , fortnite and much much more

The price am selling the accounts are 50% of their actual price. For example if a league of legends account ios worth 200 euro i can sell 100 euro. i have many accounts for sale daily. You can sell them on many sites for profit or play them depending on you.

accounts are recieved in a whitehat way and i can get 3-5 accounts daily

Looking for a longterm buyer who can sell them for double on many sites.

currently i have 15 accounts for sale worth 2k usd can let go for 1k usd . 50% actual price! i need a longterm partner

The accounts i am selling cannot be recovered that easily. Most accounts are games will require a transfer code to new device and once transfered they are non recoverable. All accounts or most also have the original email included

Furthermore there will be a week gab before someone tries to recover them and if the manage to do you will have 7 days to sell it. Thus the price is 50%

A person can easily make 1-2k usd a month just by reselling them.

I need a serious partner
