FOR ANY QUESTIONS CONTACT ME AT:theonon.hf@gmail.com or PM ME!

Stanley - December 10, 2019, 8:17 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Astonished - December 10, 2019, 8:30 am

Thanks for your contribution, I've found a few RATs in here that I haven't been able to find before so I'm going to try them on a VM and hope they really are safe.

Will post back If i see anything I think could be back doored (THINK)

EDIT: Everything I tested seemed to be fairly safe, nothing added to my VM's startup, no weird processes, and no abnormal resource usage. I did not test everything, but I tested like 3 of the Rats, 2 keyloggers and a file pumper which were all fairly safe. Thanks OP!

white shadow - December 10, 2019, 8:32 am

thanks bro, can you help me on how to use them. i am new to these

There is even my own file pumper which i included in the collection just because I wanted to, since i think it's a reliable tool and pretty useful for me! i hope it is so for the others!

Astonished - December 10, 2019, 10:00 am

May I ask though, what is a File pumper actually useful for? I like the idea of it just not sure why anyone would use it. Thanks anyway

TheAnon.hf - December 10, 2019, 10:27 am

(Dec 10, 2019 11:00 AM)killmenow98 Wrote: [\[CITE\]](#) May I ask though, what is a File pumper actually useful for? I like the idea of it just not sure why anyone would use it. Thanks anyway a file pumper modifies the size of a file, most likely talking ages and probably crashing the one i designed instead has a fast memory I/O mode which allows you up to 1TB of writing in less than 15 minutes(since i only had a 2TB hard disk laying around) it took 15.29 minutes to make a single 1TB file, it's reliable it wouldn't crash meanwhile writing on the file so you wouldn't have to bother to close and reopen it and i think the UI is pretty Noob Friendly Designed!

Astonished - December 10, 2019, 10:30 am

Sounds nice, but what would be the benefit of making a file so large? Just to be a pain for someone else? I am confused in this aspect. Cheers

TheAnon.hf - December 10, 2019, 10:35 am

(Dec 10, 2019 11:30 AM)killmenow98 Wrote: [\[CITE\]](#) Sounds nice, but what would be the benefit of making a file so large? Just to be a pain for someone else? I am confused in this aspect. Cheers some rats have fixed stub size so if someone would be enough experienced he could recognise the size of the stub and bust it!

so instead of getting busted, you pump bytes into it so it seems legit and you can actually fool everyone (Or almost)

ronyking247 - December 12, 2019, 7:45 pm

When i used to be more active in hacking, i wouldve literarily jumped at this. but i did found out this isnt my core strenght sort of. My strenght is into soucing, sales and what a view.

i'm into database sourcing, i have some list of customer needing some databases, reason im trying to work with good hacker in here together:

- you get the bases they want,
- you send a few samples to be sure (with all the information)
- you send your btc wallet and your asking price

--I forward this to them to check.
--They send in your money to you ,while you send the entire db to them.
--If they might need to negotiate, they can as well do
--You send whatever cut you deem it fit to me.
and everyone is happy!

This sure will sound pretty interesting!..

Omino dell'ergastolo - December 13, 2019, 8:48 am

Nice one, i am curious about this pack...

Have a lovely day!

Elvanse - January 6, 2020, 6:08 am

Can someone check the Digital Keylogger I think this tool got a real virus in it?

The name was a bit funny "Salty" the virus was called infected my Utorrent after I deleted digital keylogger I couldn't do then Avira said the keylogger was also the "Salty" virus.

And I am not kidding can do a screenshot Avira said salty virus. And I couldn't delete it and it even infected Utorrent. I think it could be a miner bot or something.

Everything else could easily be deleted.

(Dec 30, 2019 04:21 PM)casp3r Wrote: [\[CITE\]](#) A sandboxed VM ftw ?
Just a sandboxed windows on USB works too.

But could you tell me how you do a sandboxed vm?

I tried to find out by myself but didn't find anything.

that's why i tell everyone to run a VM lol, anyways i got everything off the owners so i will probably have 2 words with the owner of The DK Thanks for the Feedback!

Elvanse - January 6, 2020, 2:11 pm

yes, but to be precise I have read the virus wrong it was "salinity" :D the virus (even worse when you know what it actually do) which infects other programs

node106 - January 20, 2020, 4:19 am
