Thread: [{Bug Report} Scrolling on the Bio page](#)

Mr.Magnificent - December 10, 2019, 6:50 am

I just went to someone's account and went to the first post in the list, it turns out that after a while it starts to show up weird.

Gif to explain:

https://thumbs.gfycat.com/BigColossalDiscus-size_restricted.gif

Doesn't really matter to me but I know the site developers do their best to keep everything perfect so I thought i'd report :)

flavoral - December 10, 2019, 7:04 am

Had no issues trying the same thing on your profile.

Nachfolger - December 10, 2019, 7:15 am

This has been reported before, and I've been able to replicate it. Now, however, I cannot. Perhaps it was recently addressed, it would be beneficial to clear and reload your CSS/JS cache and see if it persists.

Goku - December 10, 2019, 7:30 am

Yea try refreshing your cache/css. I can't seem to replicate this issue

Bastille - December 10, 2019, 8:03 am

Already see that bug, maybe it's related to a certain web browser or it's version.

Strange, I am using Chrome Versie 78.0.3904.108 (Officiële build) (64-bits)

Good to know that it's a known issue.

Still happens after removing cache. It seems to only happen when I scroll all the way back to june 2018.
