Thread: [Help Me Get Cashapp/ Other Pay Method Working Ill Tell You Snapchat Live Pic Method](#)

An?iety - December 10, 2019, 10:40 pm

Title says it all. I tried making a cashapp on a VPN/Bluestacks, Paypal/Venmo/Google Pay won't work without verification.

I'm at my wits with this. I don't want to just get amazon cards.

I know a solid (actually kinda funny) method for sending "verification" photos.

Let me know if you can help me out

oreyo - December 10, 2019, 10:47 pm

if you can get me a kik i'll make u a cashpp

Pretty sure cashapp/venmo is gonna give you issues without a SSN, had the same issues myself whilst trying to create one. Any reason why you can't just verify the accounts to start receiving? I verified my business PayPal and never had a issue to this day.

My main account got closed for seemingly no reason. I can't verify any other accounts because I am not a female.

I'm not talking about a female name, I mean verifying as yourself? With your real info and ID.
