Thread: [Add a toggle to add "Profile Views" to peoples profiles](#)

Joel - December 15, 2019, 10:09 am

I just think this would be a nifty feature to go along with the "Recent" users addition. It would just simply show how many Overall profile views and Unique profile views. Both of which can be toggled off/on if you're a leet/uber.

Not really an important suggestion just something I think would be cool. Cheers for reading ? ?

[Xerotic](#) or Omni stated not public because it's an intensive query.

Fair enough. Can't you just use slave dbs with read only to try get around that tho?
