Thread: [\[FREE EBOOK\] PAYPAL EXPLOIT | BTC TO PAYPAL | 30% PROFIT EVERY TRANSACTION](#)

LagDrop - December 17, 2019, 9:01 am

Hello everyone!

Today im sharing an ebook for free (no bullsh*t, because is my own exchange service) ?

Its an recent exploit found in paypal which allows me and my partner to exchange our paypal balance to your BTC with 70% rate! (30% profit for you for every transaction).

The best of this is stock is unlimited so we can do it daily and the highest amount your paypal can take daily for maximum profit.

This exploit is legit, not some sort of bs scam...If you have rep and vouches i can go first! Yes you heard right, i go first if you have some feedback!

You only have to fulfill these two requirements:

- 1 - Aged Paypal Business Account (at least a few months) with transactions and activity on it
- 2 - In possession of lot of btc or ability to buy (+18)

If you do not have these two requirements do not waste your time downloading the ebook, its absolutely necessary!

No one download this.

Shabbiest most obvious scam I've ever seen. PDF is probably some sort of exploit or binded.

30% profit for us every single time with your unlimited stock? Yeah okay buddy. The fact that you are wanting us to provide you with currency we can not attempt to dispute/get back is obvious enough.

Peace homeslice

For future reference, saying its not some bs scam makes it even more untrustworthy. ? ?

PDF is clean but the method is clearly a scam.

I understand, you guys had been scammed so many times and saw so much bs here...when its too good to be true its simply a scam LOL ?

Even going first (you can literally send to other paypal account, withdraw or cashout buying something before you send the BTC) do not change nothing i guess.

More easy to say its a scam before even deal with me first.

Looking for customers with rep & open mind to test this (i repeat, im going FIRST) and leave a vouch for septic people.

See the way you are so willing for us to take the money and spend it or cash it out before we send you BTC makes it clear to me that you are up to some really blackhat stuff. You are probably stealing paypal accounts or using stolen cards. No one would have "infinite stock" of paypal balance, that's literally "infinite money". Something is going on that you don't want to tell us about or you are trying to buy Crypto without your own money. Its very obvious my friend, no one would be willing to lose their own money like that.

? ?

You are making assumptions without reading the ebook, its a waste of time talking more with you!

In ebook explains why the money is "infinite" but better to make up stories about what im doing and call this a scam only reading the title ?

Cashout advice is only for people like you who think this is a scam and want more safety, ffs! If if you think this is a scam leave & do not come back!

Or you could understand that literally no one will do this service with you because of your -2 rep and how dangerous it already seems ? Go try some where else

-2 actually because of only 1 member who i caught fake vouching and give me -3 just because he didnt liked to hear the true. Thats how sad are some members on this forum. Rep nowadays are gave by alts and friends anyway, dont be naive to trust 100% because of good rep, you are smart enough to not fall in my "scheme" ?

Dont worry bud, im already trying.
