Thread: [bussiness idea if you're creative and watch lots of youtube](#)

**CyberError** - December 18, 2019, 1:34 am

okey , so i know some of you mf are creative and watch lots of porn youtube , here i have a bussiness idea for you, you can do it fulltime or parttime either way you gonna make some good money

since most of successful youtube put 2-3 hours just to select A Right Thumbnail for their video but its not easy work and thumbnail and right tittle is what makes a video viral or help the video get view or more watch time ( some of you know what am talking)

you just need to know about the video + should know little bit about photoshop to make a stunning thumbnail a Big youtuber dont mind paying upto 500\$ for a single thumbnail if you know what you doing .or you can target small youtuber and can charge 50\$ for a creative thumbnail,, here am not talking about the service which fiver offer for 5-10\$ they just make you a random thumbnail they don't put their time and are unprofessional at selecting any thumbnail they good at photoshop tho

so here we got a nice plan

the only main thing required is :-  
creativity

if you're confident about your work  
start giving out free thumbnail to youtubers 50K-200K range and use them as your portfolio

of course its a good business plan and idea, but how to know what is good thumbnail?

For this business plan to work, you need to have a contact list filled with YouTube content creators willing to pay you rather than a guy they are already working with. No unsuccessful content creator would pay as much as you're saying, and successful ones have already found their mantra :)

if it promote HIGH CTR ( click through rate) it mean its GREAT Thumbnail

easy lang :- if it makes you click on video as soon as you saw the thumbnail ( check your youtube homepage)

learn the above thing i mentioned

first make brand and your website

hire people and train them  
make a team out of them  
take order and give your team this all work  
autopilot ?

obviously you have to do it first to make it as much efficient as you can , only then you can be able to autopilot this

To be honest, I already do most of what you've mentioned. Not as a designer, but as a writer. I take up writing assignments and pass them on to my writing team. I correct them before submissions for a 50% profit.

But somehow I am not satisfied. I wish to have even more freedom, so I am looking forward to finding some other, more reliable method <3
