The best thing you could do to make it easy on yourself is do a LAMP install on your server then install phpmyadmin create database import sql and upload your files to /var/www/html. Or if needed provide me a way to contact you and i will assist you.

Dotexe - December 20, 2019, 10:18 am

Do not setup athena, it is vulnerable at its finest.

?BADMAN? - December 20, 2019, 2:12 pm

Athena is one of the best open source c++ bots.Sadly for op if you cant even setup it it's useless.
