Thread: [Minecraft survival economy server looking for staff](#)

Eighteen - December 20, 2019, 10:54 am

Introduction:

Hello everyone, lately I've been working on putting together a Minecraft server dedicated to survival economy. Basically the goal of the server is to get rich the best way you see fit as well as enjoy a traditional survival Minecraft experience and feel (Player warps, auction house, land claiming and more). I plan on strictly keeping the server on this one server type and do not plan to have a hub or anything like that. I would like the sole focus of the server to be on one type of server and stay that way. The server name is ECO-MC and I am currently looking for some experienced players who are interested in helping out & joining the staff team. My idea is to create a server that I personally would enjoy playing even if I didn't pay for a rank.

Currently the server is NOT open to the public. I plan on setting the server up so that there are many ways to make money although of course some ways are going to be better than others. We utilize both a physical shop and a GUI shop for the convenience of our players to buy and sell how they would like. Our server also offers a bunch of additional features for all players on our server which is listed below.

Current server features / perks at default rank:

Spoiler ([Click to View](#))

- Multiple set homes at default rank
- RTP (random teleport)
- Set player warps at default rank
- Auction house
- Ability to create chest shops at default rank
- Land claiming & hourly free claim blocks for playtime
- Quests all players will have access to quests that reward you for things you're already going to do! (Break x amount of blocks and more!)
- Sell at /warp shop & with /shop

Things I need help with:

In order to get the server ready and opened for everyone I currently need help with some particular tasks as well as miscellaneous tasks that may pop up. If there is something you feel you can help with in particular please do mention. If you are not interested in becoming staff once the server is opened and are just looking to help that is welcomed and appreciated to.

Spoiler ([Click to View](#))

- General staff tasks when open (Chat moderation etc)
- Potentially creating a PVP arena (may have one already)
- Help with furnishing spawn as it is a bit empty
- General testing if needed (commands and plugins etc)
- Other small general tasks that may arise before the server is opened

I'm not looking for a full application but you're welcome to do something similar to it. If you're

interested in helping out in anyway please do shoot me a pm or reply to this post with some of your skills / what you're able to help out with. Would love to bring some new faces on to help out thanks to anyone interested!

Hello there, currently the server is basically in a BETA state it is not opened to public. I am only looking for members who are interested in a staff position and willing to help out rather than just playing right now. Feel free to shoot me a PM if you're interested still but I do advise you read the thread thoroughly to make sure you know what you're getting into and make sure it seems like something you'd like to do.

I will shoot you a pm when the server is open to public and hopefully I do see you then. (This will most likely be around the middle of next month).

Hey man. Currently the spawn is built but I do need some help with other things and i'll list them for you. (Creating a PVP arena, small tasks around spawn like putting ender chests and anvils around etc.) I do have small other tasks I could use help with but I don't have them off hand. Shoot me a PM if you're still interested.
