Thread: [392x my bet in return! Big Profit!](#)

Lorem Ipsum - December 21, 2019, 4:41 am

My \$0,20 bet which turned after winning the Free Spins into \$78,48!

Participated with some crypto program and got about \$7 in BAT for free.
Can't payout to bank and I decided to gamble, once again.
Best decision of today! Feeling really lucky ?

Xen - December 21, 2019, 7:10 am

Congrats man, that's a pretty nice win :D

Mohinder - December 21, 2019, 7:36 am

Hehe nice. Made like 350 \$ with 10\$ last night. Feels good man.

Mullet Muscle - December 21, 2019, 7:55 am

Insane profit return
Good for you man

Lorem Ipsum - December 21, 2019, 9:59 am

Thank you all for replying, I do appreciate it a lot! I was lucky, paid out like \$70 (\$55 is going to bank) and the rest is saved for a little surprise haha.

Zexi - December 21, 2019, 10:38 am

Congrats! What site did you use? Most of the crypto related gambling sites are shady as fuck. :D

Fortunejack.com
I must say the website has great support and pays out fast every single time.

About BlockChain though.. I exchanged my ETH for BTC and had to pay \$7 so I only have about \$4 left which isnt enough for a giveaway or contest I think. Anyway the rest went to Bank so I am happy ?

Cooligan - December 21, 2019, 2:09 pm

Damn lol yeah that's a pretty damn decent profit to turn only \$0.20 into \$78.48

I did something similar once when it comes to how much you won at least, I turned \$10 into \$80 on my 18th birthday at a casino lol.
Was playing some random slot machine.

theoldbrit - December 21, 2019, 2:40 pm

That's not something you see every day! Congrats man

Was playing some random slot machine. Thank you! The only 'downside' to all this is that I end up paying \$7 for exchanging my ETH to BTC to request a payout to bank. So my \$70 in my wallet became \$63 when paying out.

Sounds like you had a great 18th birthday then haha. \$10 into \$80 is a nice amount especially as your first adult ?

Wait, is the gambling site making you pay the \$7 fee or is this your actual wallet charging you this? If it's your actual wallet I can show you how to avoid paying such a high fee.

And hell yeah man, I was pumped lol.

Wallet. The payout at the casino site is \$30-\$32 (0.0044 BTC) I think and my current website which only accepts BTC to send to bank forced me to use my wallet which makes me broke while exchanging coins haha.

Well instead of you transferring it to your bank from your wallet, you could just exchange with someone who has Cashapp that can send it to yours, and then it's only about \$0.10 to withdraw to your bank from your Cashapp account.

Will save you that \$7.

CashApp is for USA only, right? I'm European. I normally gamble with either LTC or BTC because I can payout easily, yet this time I had \$7 ETH (couldn't exchange BAT to BTC in my first wallet without high fees). I appreciate your tip, but it's a well thought action I had to do ?

No I believe Cashapp is available to both US and UK residents, however a UK Cashapp cannot send to a US Cashapp as of yet, no international payment system is setup.

But if you're in the UK you can download it for free, add your debit card, and then simply just do an exchange with someone who wants the BTC. ?

I'm not from the UK nor US haha. I'll keep using my BTC wallets (Blockchain, Coinbase, etc) because I rather do things that keep working for me and at places I already verified my bank than switch and add some kind of card or another type of verification.

I do appreciate the tips, though, you're amazingly kind my man ?

Oh yeah I feel you, verifying with your ID is annoying sometimes with those sites so I can see why you wouldn't want to switch.

And ah damn, idk why Cashapp isn't international yet, they'd have such a HUGE customer base if they were.

SO many people in the US use Cashapp, it's literally the best payment platform in existence in my personal opinion. Fees are incredibly low and you can buy BTC at a 1:1 rate with a verified Cashapp.

I also use Blockchain and Coinbase, Blockchain primarily though.

Have you earned the \$126 from the crypto learning's on Coinbase yet?

Perhaps it is time for me to expand my network and get my own 'USA Cashapp to BTC exchanger' to get this done for a small fee.

I appreciate, again, all the tips and helpful attitude. You're amazing!

Yes I did the Coinbase training for several coins. So far;

- OXT signed up for
- XTZ earned
- Dai earned except \$14 which is concluded
- EOS except the \$40 by referring others
- XLM except the \$40 by referring others
- Zcash was too late to earn unfortunately
- BAT earned my \$8 fast and turned \$7 into \$78 (see Jackpot Warriors)
- ZRX was too late to earn unfortunately

This been said, I got a tip to earn more coins which is what I'm about to do soon. Let me know if you got any other crypto program for me, I'd love to earn a few bucks for free again ?

Oh no problem at all my dude, I like to see everyone profiting. ?

Also damn bro! You've done a lot more crypto programs than I have, I've only done the \$50 XLM from Blockchain so far, I still need to do the \$50 EOS and \$50 XLM from Coinbase, as well as the other two which are \$20 and \$6 I believe, totaling to \$126 from Coinbase alone.

Where did you earn all those other cryptos you listed?

I'm planning on doing at least the \$50 EOS and \$50 XLM from Coinbase today if not the full \$126 as I need the extra BTC at the moment, on vacation haha and need some extra spending money.

Everything I listed comes from the 'Coinbase learn and earn' program which you can find by Googling the words I put a ' for.

I skipped the 2x \$40 to refer others, because I'm not surrounded by people who are willing to do so. There is enough money to be made out there, we just have to find it.

Cool man sounds good.

Well if there's some way that we could refer each other for the \$40 I'd totally be down.

If I'm understanding this right, that is. ?
