Can anyone crack it or give me a serial?

Pic of that:

There's one for 3.5.5, I haven't tested, nor scanned so download at your own risk?

Hitmanpro scans in the cloud with scan engine's like avira/nod32/emsisoft/etc... It is very, very effective.

Scans take like 2 minutes, it's real fast

Do anybody have a product key for 64-bit version ? I use w7 and can't install 32-bit on this os.

hackit12 - December 2, 2010, 9:30 am

you can download from piratebay link that Baaaax provided its clean, because RobbingHood is legit and trusted uploader there.

Hey!

Look here:

<http://katz.cd/search?q=Hitman+Pro+3.5.6>

katz.cd searches through free warez sites and shows the links to the forum entries.
I can't provide that the tools are infected, but I run all my tools I download in a VM first!
You should too!
