This looks great! And I am not just saying this because you use my username as content haha. All jokes aside, I do love the design, the yellow colour pops out which is good to see. I do have my doubts though about the colour in the boxes at the Prices section, it's hard to read perhaps make it a bit brighter of colour or something. Just my thoughts though, either way a great design ?

Just tried it out

It's very generous of vyactor to give out something like this for free. It looks good and professional. The template is clean and easy to use. Any complaints someone would have about this would be the biggest nitpick. All in all I'm very happy with the template and I can't wait to use it!
