Thread: [Budget Build is it worth it to build with these spare parts I have?](#)

Moon Rock - December 25, 2019, 1:00 pm

So I'd like to build a desktop that I can use to download movies and play some basic games like Minecraft and Call of Duty. I have extra parts from a PC I built like 4 years ago.

I have

RAM

Crucial Ballistix Sport LT 4GB DDR4 PC4-19200 (DDR4-2400) Memory (BLS4G4D240FSB) (1)
CPU

Intel Platinum G4560 3.5ghz

Mobo

GIGABYTE GA-H110M-A

Is it worth it to build off these parts? If so what is recommended?

Breeze26509 - December 25, 2019, 1:13 pm

I mean yeah you could. I probably wouldn't expect it to play CoD though.

[PCPartPicker Part List](#)

Memory: [Crucial Ballistix Sport LT 4 GB \(1 x 4 GB\) DDR4-2400 Memory](#) (\$18.95 @ Amazon)

Storage: [Crucial BX500 240 GB 2.5" Solid State Drive](#) (\$30.30 @ Amazon)

Video Card: [Sapphire Radeon RX 570 4 GB PULSE Video Card](#) (\$123.98 @ Newegg)

Case: [Deepcool TESSERACT BF ATX Mid Tower Case](#) (\$46.99 @ B&H)

Power Supply: [Corsair CX \(2017\) 450 W 80+ Bronze Certified ATX Power Supply](#) (\$59.99 @ Corsair)

Total: \$280.21

Prices include shipping, taxes, and discounts when available
