Seagulls - December 25, 2019, 3:20 pm

Forreal though, I remember once in school I was like 8 and our teacher put a picture up of some money. He said (roughly) sit down if this money equals £1.12 and stay standing if you think it equals £1.22. I stayed standing and everybody sat down so with a couple seconds delay I copied them to save any embarrassment. Turns out I was the only one who was right and should've kept standing. He said I was stupid for following the herd.

I still remember that to this day ;/

i have multiple personalities in head

I have to say people who say they are smarter than others, in fact, they are not that smart. People learn constantly throughout life but does not mean that they have the same interest in topics as you therefore, I consider smart people to be capable to adapt communicating with others on global topics without over-emphasizing themselves so as not to offend the person with whom they interact.

shankfisherxd - December 25, 2019, 3:49 pm

this is horrible bait tbh but if you think you're 'smarter than the rest' you probably aren't.

Rally the Bulls - December 25, 2019, 4:10 pm

Troll or not, this is a terrible outlook. When you decide you're smarter, you decide to stop learning and trying to improve. Not something I'm into.

However, any one can see their full potential. It's just a matter of allocating your most important asset more efficiently. Time, is ticking. Quit watching TV, playing video games; apply your self. And you can be declared as "smart," so lazy people don't feel as bad about being lazy. Since they cant help it.

people with less than 1k rep have the IQ level of the Model T HP.

Pawnhub - December 25, 2019, 6:08 pm

I'm convinced 99% of people who think they are smart are probably not smart.

I have no shame in admitting when I don't know something. I dislike people that always think they are right and can't own up when they are wrong.

luke - December 25, 2019, 6:16 pm

ah yes, i realised when i was 3 years old and my mother couldn't recite the Pythagorean theorem to me
