Thread: [4x your money flipping SUPREME](#)

PresentNow - December 25, 2019, 6:20 pm

Hey guys!

Have some extra money and want to use it to flip "hyped" clothes?

You can use a this site/program called [SupremeAccess](#). How it works is that you put your purchasing info into it and then Supreme releases their clothes on Thursday mornings at 11EST, this software will buy it on Supreme's website using your information in seconds before it sells out.

With this website, you will need to pay a fee that varies depending on the "hype" of the item that is coming out.

Once you get a confirmation link from Supreme, immediately list it on [Grailed](#) or eBay to resell it. Price it accordingly to how other people are pricing the same item. You could try websites like StockX but I've never used it.

You should be able to easily double to quadruple your money or more depending on how hyped the item is. In the past, I've been able to buy a \$30 shirt on Supreme and resell it on Grailed WITHIN 30 MINUTES from purchasing it on Supreme and sold it on Grailed for \$300+.

I am in no way affiliated with SupremeAccess, just thought it was a solid program and money making opportunity for people.

Let me know if you need help getting it to work or have other questions about reselling Supreme. Hope you enjoyed! ?

I would assume you provide your payment information to SupremeAccess.

1. How do you know they don't simply dump your credit card info while offering "legitimately" this service?
 2. What guarantee is there that one day they'll simply take your money and run away?
 3. What stops you from placing the order yourself if you know the release is at 11 EST Thursday?
- Does Supreme have an API for placing orders?

My recommendation for anyone wanting to try this is; stay away. Not worth the risk.

Hey! You have some reasonable concerns!

1. They are reputable with a decent collection of customers that have profited with their site, check their [Twitter](#) for customer reviews.
2. You could say the same thing about any online retailer that uses their own payment processor haha. You can't be sure at the end of the day with anything online so I'd recommend you use a credit card if you are paranoid about this.
3. You can place the order yourself but you are competing against bots that work in milliseconds, it's very difficult to purchase anything without a bot. No, I don't believe Supreme has an API for this.

Hope that cleared some things up!

Yeah, you are paying for a slot on a program that buys it.

The clothes will be sent to my home address (if I put my home address in the purchasing info) first before I can resell it?

Yes! So order the clothes to your house and then ship to the buyer once you have received them. Make sure to constantly update your buyer with shipping location so they don't get nervous and cancel the order.
