\$50 for a saturated pack?

Shoot me a PM and I'll give the 40GB folder away for free. Has 2016 to late 2018 stuff.

Saturation shows that a certain pack is well and successful. It took me a while to find the pack actually as most of the old links are now down due to copyright on a lot of old sources as early as a few months ago.

In CPA saturation was the best. You just have to dominate the market and do better then your competition. If you come off more professional and authentic, you could play others off as fake easily. These clients are stupid and willing to believe whatever you make them believe as long as you sell them.

Aside from that, sure i'll shoot you a PM and checkout what you're talking about. Someone is selling the same pack in Premium market for much more then I so the price stands.

Saturation shows it makes money yes but the likely hood people have seen it before and won't buy is very high esp with older saturated packs

Agree, but disagree. Alison Parker pack still makes stupid money when plenty of people know who she is. You'd be surprised how many people don't know who others are. If I'm able to do that with someone with such a huge following, you can easily do the same with this pack. I have more experience in e-whore then most on here. I've made more then most in a shorter time on here. My first couple months did over 10k
