Hey guys,

Some of you might know this project already.

I've been working on it for the past few days and it has heavily been improved.

Features: Colors for Online/Idle/Busy/Streaming/Offline

Display Custom Status

Display Song that's being listened to

Display Song image

Display Game name and level that's being played

Display Game image

Display when you're programming, what project and what file you're editing.

And more features will be added...

Get yours here:

<https://discord.c99.nl/>

Playing game:

Listening song:

Custom Status:

Streaming:

Coding:

Enjoy and let me know if you like it. ?

Seems awesome.

Is this more meant to be put into signatures and such?

If so then how do you add it to a signature? Not too versed in the way of signaturing to be honest.

It can be used for anything.

Can be put on your site, signature on forums etc.

On website's it's through the following code:

Code ``

On forums it's through:

Code `[img]url_here[/img]`

This is amazing! Thank you so much for this [? Soufian ?](#)

I can really see this blowing up, as I have looked around for this a while ago and I'm sure many others have too!

Maybe in the future you could create different themes to choose from when creating the banner, and maybe a option to add custom text to the top or bottom (idk just throwing some cool ideas).
Thank you so much for creating this ?

Seems to work fine for me, no downtime has been detected by my monitoring either.

What does your browser tell you when trying to visit it?

And did you try incognito modus?

Wow! Good job on that and thank you! This is really awesome!

genesiseher - January 8, 2020, 12:12 am

not sure i understand this.

i have to be in your server for the image to work at anytime.?

cause seems pointless if thats the case as just a way for you try and get all hf users in a discord lol

JasperRed - January 8, 2020, 12:18 am

doesnt this break rules as advertising discord is against the rules?
