Thread: [Made roughly 3k in ~ a week](#)

TheGodEven - December 30, 2019, 10:42 am

No long ass text, made about 70k trx, 40 ltc and 1 eth pure profit on gambling. Thankful for all prayers and donald j trump. God bless murica.

My plans? Now buy coke and bitches.

Jk, probably going to cash out 90% and leave 300\$ to start all over for next week.

I'm going to try this as an income stream like these guys in india. Mathematically it would work but every gambler out here know what happens next.

Thanks for reading, have a nice morning.

Always understand that with gambling the house always has an advantage on the long run. If you win 70k today, you will loose 140k tommorrow.

If your thread is not troll, i would just walk away with the profit. Unless you are great at playing poker and luck is on your side you will never make any money over the long run off gambling.

?

Yea house edge kills. I am constantly spying the bets that gets played, if i see some guys lose 2'000\$ i go and play. I also aim for 300\$ a day which is roughly 9'000\$ a month. Do this for 3 months and then i'm done with gambling.

Also it's not poker, it's dice.

You win when others lose, you lose when others win.

I can actually assure you that there is no dicing method that will make you rich, i say this out of my own experience.

I have exploited many methods and even tried to trick the algorithms but eventually you will run down to 0 and lose everything.

Agreed lol the owners of the sites would shut them down fast if they started to see themselves losing a significant amount of \$\$\$. Or if there was some "flaw" in their system. They're designed for people like that to make them think at all there is some way to get an edge over the house and keep you gambling lol

JaGLY - December 30, 2019, 11:25 am

Also understand that most Gambling works with a RTP ("Return to Player") %. If the dice has 98% RTP you might be lucky and win, but once the casino's payout runs above their payout rate it will just bring you to 0.

For a casino that brings in 50k\$ a day it's peanuts to pay me my 10-20k in 3 months. But i get what you are telling me. Am doing this since a long time occasionally but never progressively to aim for a goal. Remember 2.5k-3k \$ a month is a half year salary in some countries so more than enough for me.

greed management is important. Don't play when you already won 1k\$. Don't x2 your bet in a red train cuz it can come 27 times straight red if it wants.

Just sometimes use ur brain and when u lost like 10 ltc start over with 0.1 and shit go back to 0.05 etc.
