Thread: [someone that can code for me an app \[android\]](#)

oakload - December 31, 2019, 5:14 am

Hey , im looking for someone that code code for me an app that will work like Youtube Vanced.

No ad's on the videos, and can play the videos/music of youtube on the background .

Need it to be ready for today/tomorrow maximum!

HMU

Are you joking? Some is supposed to code you an Android app for today, on NYE?

I don't know what Youtube Vanced is, so I don't know how complex that app is, but to be done in one day, it's impossible haha, unless you're ready to pay an enormous amount of money.

Coupe - December 31, 2019, 6:20 am

I can do this for you but probably tomorrow. Add discord Width#9989

there's lot of open source's in github, the coder can use from that sources.

Can do this for you, will cost £400.

Start contract or PM me, but will take 4 -7 days.

this thread will stay here forever i think lol you should edit it and fix the time issue no one gonna do this in one day " only if you pay High amount of money you can find someone " but you don't offer anything special so you just give a time for the coders and they can make it without a problem also try to use MM always
