Your image is broken and why not upload the video to YouTube as a series?

It's strange, sometimes the image shows fine, other times it's broken. This is an enrollment, not a download, so there's nothing to upload to YouTube. Although you've given me an idea for something else... thanks.

Where does the first link bring you? Following the Google Drive link from VT, I come across folders with different tutorials.

I'm sorry, you're absolutely right.

I confused this with another thread. The YouTube suggestion makes much more sense now.
