It does but it ships from the US. Someone mentioned that they payed \$40 for shipping to the EU, not sure where. I paid \$7 for shipping in the US. I don't want you guys paying an arm and a leg. Go to <https://gfuel.com/collections/starter-kit> and add one to your cart and just check what the shipping would be. It could have changed because this has been well over a year ago since that happened. If you guys are interested just let me know, but yeah it does ship to EU.

I don't understand what this is, is it Gatorade for gamers or something?

Just consider it a pre-workout, coffee x10 but targeted towards gamers instead of people that go to

the gym. It's kind of like a Red Bull but helps you focus a lot more type of thing.

I have never had one of these for this long. You know you want some G-fuel and a nice shaker ?

Builder_Geeza - May 20, 2020, 2:46 am
