fstr is one of the most childish, autistic and retarded scammers in the scene right now. You really think this guy cares about langod getting scammed? all fstr is doing is trying to make himself look more legit by calling out other people for scamming even though hes a scammer himself. Hes just an 18 year old kid acting like he knows everything but hes the biggest liar ever.

I have no idea if int main() is a scammer but i definitely wouldn't trust him.

nobody is trying to bargain prices, you told someone you had a cf cheat for 10/mo on here and just a few days later when i ask you say 30...

PingersAndMash - January 12, 2020, 3:38 pm

If he's paid you \$400 dollars which he obviously has as you didn't deny it you should give him a working shit

Pretty common for cheat devs to not support lifetime buyers a few weeks later seems like most if not all are lazy af there's a reason they don't get a real life job
