Sup guys, just a couple of minutes ago I decided to check the official website of Immiment and I see this picture: "This site has been taken down"

Check it u: <https://imminentmethods.net/> (no ads)

What do you think about it? Will there be danger to Imminent customers? Is Shockwave arrested?

Well, excuse me, I only found out about it today, it's very interesting why they arrested Shockwave, because he followed almost all RAT rules
