Thread: [Beginner looking for a fellow beginner to discuss with and learn together](#)

Jared Salazar - January 4, 2020, 12:27 am

Hey, I'm just looking for someone who is also at the beginner stages of ewhoring. I literally just learned about it on New Years Eve. I have made around 400 dollars so far over the span of 4 days (but obviously a lot of time is spent configuring setups and learning new skills for photoshop, fakesnap, traffic etc.). I think my social engineering skills are pretty good, as a younger kid I used to scam other kids out of virtual game items on TF2/CSGO and made ~2000 dollars. Could have made more out of some kids but I got cold feet at the time because I was so young.

Just looking for another amateur that wants to grow with me together. Needs to be able to be available to talk consistently because I'm really into this but I'm really trying to learn how to scale and setup a shopify/website to sell premiums, etc.

Let's grow together, happy 2020!

:))

Pm me for discord, that's what I primarily use

There are a lot of tutorials on right here. I think those tutorial are better than find beginners.

Hey mate, add me on discord Fragnar#5501

At this moment i'm testing alot of strategies we can share our experience and point of vision. I make first day around 100£ in amazon gifts cards, i will spam you messages about ideas and thoughts all day, so better think off are you interested to add me as a friend, but i'm pretty sure we can make more money together.

How do you guys even start? I always wanted to do it and you made 400 in 4 days? And you just knew about it on new years?

Damn is it ok if you could teach me the ropes? I'll share ideas too once i get the hang of it.
