Thread: [Esportal Cheat and/or FaceIT cheat](#)

field - January 5, 2020, 5:50 pm

Just looking for aimbot, maybe esp/radar if possible (heard it's risky so only aimbot is fine).

I have a huge budget for this, will be paying monthly. I wouldn't suggest attempting to scam me, only dealing with reputable members. I may be new here but I am incredibly reputable on other forums.

if you have 3000 euro+ and are willing to send your motherboard to Denmark. I might be able to help you.

What features will it have?

What platforms will it work on?

How would the process work, like would an MM hold funds?

How long would it take?

only aimbot.

any platform.

could be possible.

a day, but receiving the mb and sending it back, might be time consuming depending on where you live.

I am just trying to figure out how we would do the transaction, so would I send funds to an MM which holds it until I get the motherboard back and confirm that everything works? Have you ever done this before?

I haven't, my friend who is a electronics engineer has for a fortnite and also a lol cheat with another software-dev, but the customers where danish, so no mm, since the state and police is enough of a mm here. But well he contacted me last year, and asked me if I was up for it. so we met in summers when we still attended same university, he showcased the fortnite cheat, and told me to come for him, if I ever found someone interested, but well 3000 euro is a lot, so haven't found any.

Be free to write to me a PM, and I'll catch up with my friend, if you interested.

Downside is you'll be lacking a motherboard for some time, and if you want to upgrade your pc some day, it really sux.

menalix is well trusted, for a onetime payment if its ment to last long then would definitely go with

him. I would place my trust with menalix.

JW1337 - January 6, 2020, 1:55 am

I would trust Menalix, that is a great deal imo, especially if you have a mobo that you think will last you a good chunk of time.

Rall0ck - January 6, 2020, 10:44 am

If you have that high budget go with menalix but if you want cheaper solution DM me for proofs and discord

skadro - January 6, 2020, 6:53 pm

Well ye its pricey but there is a reason for it and considering its menalix, 0% chance of being scammed.

You just have to ask yourself if its worth that price to cheat.
