Thread: [I can't seem to install kali in Virtual Box](#)

212DB - January 8, 2020, 7:15 pm

Hi there,

i've watched so many kali linux videos and also virtual box videos and i still can't install kali linux on my virtual box. Can someone help me by using Teamviewer?

what12345 - January 9, 2020, 9:06 am

Have you tried using their prebuilt virtual box download?

Thank you so much ill try and hit you back with the results

Bastille - January 16, 2020, 11:33 am

Hello buddy, what about the result ?

Is you virtualization activated on your bios ?

Tyr - January 17, 2020, 10:49 am

I would recommend you not trust anyone here to help you via Teamviewer unless they have a lot of good reputation behind their name. Just saying.

This should be works.

You better do it by yourself.
