Thread: [Private Investment Group | Make Real Money \[NO STOCKS/CRYPTO/ETF\]](#)

wraxu - January 9, 2020, 2:23 pm

This is not an ebook, or some bullsh!t method. This is a serious group for investors with large amounts of money looking to make some good returns.

If you don't have AT LEAST 4 figures to invest, this is not for you. This is not stocks/crypto or any kind of online trading, you will have to invest in physical items which yield great returns.

The group is currently priced at \$50/month, but will significantly increase later on. If you get in now your current price plan will continue for a certain amount of time even after price increases.

I'm willing to provide a vouch copy to a trusted member, they should contact me.

These investments are 100% legal and whitehat.

I meet the requirements, still offering that vouch copy?

Mr Monopoly - January 9, 2020, 3:01 pm

This sounds kind of a Ponzi scheme. Just saying

What are these items we are investing in?

Are we going to have an access to them or we invest into you so you resell them etc ?

This is no ponzi scheme or anything like that haha. You buy the items yourself (one's I advise you too) and then hold onto them and sell them at a later point.

I'm thinking something along the line of cars or buying in bulk and reselling.

So this is basicly a dropshipping group but for people who want to do the effort of buying them physically instead of actual dropshipping which would be smarter?

Or a group for people who don't know that dropshipping online is possible and they buy these items online or offline and resell in real life?

I don't get it, what are we paying you for? To know what the item is?
Am i missing something?

50 is cheap tho i guess

Basically just to know what the item is as I see it.

I've never made a DS store for anyone. Regardless, this isn't DS...

Right, I got the vouch copy and here's my review:

Let me start off by saying that the concept is very well known and a lot of people do it. Does that mean you won't make money? No, you will make money, there's a reason a lot of people do it. I'm not too knowledgeable about this market, however, I can clearly see the potential. I forgot if OP mentioned this, but you need to physically receive packages as well. There's a total of 4 calls in his

discord at the moment. He gives a reason, price prediction, and risk factors for each call. This does take some capital to make a lot of money, but it's probably worth it.

I'm not quite sure why OP is defining this as a "private investment group." I honestly don't know if this is worth \$50 a month because there's probably a lot of discords/sites/communities that do this same thing. I feel like OP should disclose what his calls are for since it's nothing secretive.

Overall, it's an 8/10 for me. Definitely some money to be made, but I honestly don't know if it's worth \$50 a month because I'm not in this market and have limited knowledge. Cheers.

Thanks for your review. There will be other more "lowkey" opportunities in future, hence the "private" part of the thread.
