Thread: [Capturing Screenshot - BitBlt](#)

ShallowME - January 9, 2020, 4:01 pm

I want to capture screenshot of the entire application which expands beyond the screen when it is running in full screen mode.

Using the basic BitBlt method I am not able to account for the image that goes beyond the screen(It comes out as black).

Can anyone help? ?

I'd suggest to just take full screen screenshots, see

<https://stackoverflow.com/questions/37132196/multi-monitor-screenshots-only-2-monitors-in-c-with-winapi> for help

I did look into StretchBlt but my bitmap size is same and requires no resizing whatsoever if I understand this correctly.
