Thread: [How fast can you do Rubik's cube? Game](#)

eGod - January 10, 2020, 9:45 am

Hello there.

Let's have some fun. ?

How fast are you able to solve this Rubik's cube? <http://nealcaffrey.com/>

Link a screenshot and a picture of the cube when it's done.

Good luck!

I did not code this one.

Just found it on Codepen, if you find it interesting and want yourself, here's the link [Codepen](#)

Fish - January 10, 2020, 9:49 am

I use to be able to solve half of it and the other half by following instructions. I still can do half but haven't done it in years

eGod - January 10, 2020, 9:53 am

(Jan 10, 2020 10:49 AM)Fish Wrote: [\[CITE\]](#) I use to be able to solve half of it and the other half by following instructions. I still can do half but haven't done it in years

I can't do it either, to be honest.

At least not right now, but I am pretty sure I could learn it fast

Lorem Ipsum - January 10, 2020, 9:54 am

I can't even complete one in real life, so I won't try this online either haha.

I love the design though, wondering how many members are able to complete this fast! Well done ?

Fish - January 10, 2020, 9:54 am

It use to be big back 10 years ago, I bought my own good cube and everything. Haven't touched it in years though

Bossk - January 10, 2020, 9:58 am

Beautiful site, made using what framework?

rsx - January 10, 2020, 9:58 am

I remember I memorized the algorithms back in middle school years ago, my record was 40 something seconds.

Damn I was a nerd, but in my defense my school was having these competitions and the only reason I learned it was to show people it was easy to memorize lol.

eGod - January 10, 2020, 9:58 am

(Jan 10, 2020 10:54 AM>Lorem Ipsum Wrote: [\[CITE\]](#) I can't even complete one in real life, so I won't try this online either haha.

Just wondering how many members even are able to solve it.

Not taking any credits for the design or the coding, I didn't code this one.
Just looked at some fun codings at codepen.

Lorem Ipsum - January 10, 2020, 10:00 am

Just looked at some fun codings at codepen.

Some family members of me can do it, but I just can't find the "logic" behind the calculation.
An uncle of me, for example, looks at it.. thinks and completes it like 2-3 minutes like some kind of no offence Asian kid does in 7 seconds.
I highly respect the way a brain works when solving such a thing. I'm good with numbers and such, not with Rubik's cube ?

Too bad you didn't design the website itself, it looks amazing!

eGod - January 10, 2020, 10:01 am

(Jan 10, 2020 10:58 AM)Bossk Wrote: [\[CITE\]](#) Beautiful site, made using what framework?
I didn't write the code of this one.
Just updated the thread and put the Codepen link for it!

(Jan 10, 2020 10:58 AM)Nuzi Wrote: [\[CITE\]](#) I remember I memorized the algorithms back in middle school years ago, my record was 40 something seconds.

40 seconds is pretty decent.
I'm not sure what the world record it.
You should start doing it again, and set the world record lol

(Jan 10, 2020 11:00 AM)Lorem Ipsum Wrote: [\[CITE\]](#) Some family members of me can do it, but I just can't find the "logic" behind the calculation.

Well.
Train your brain and you will find the logic in doing it.
Every thing is possible, right?

Lorem Ipsum - January 10, 2020, 10:03 am

4.22 seconds is the World record at this point ?

eGod - January 10, 2020, 10:05 am

(Jan 10, 2020 11:03 AM)Lorem Ipsum Wrote: [\[CITE\]](#) 4.22 seconds is the World record at this point ?

All right.
Never mind then, no one will change that record

LoremIpsum - January 10, 2020, 10:13 am

(Jan 10, 2020 11:05 AM)Neal Caffrey \$\$ Wrote: [\[CITE\]](#) All right.

When looking at the world record holder, I'd think the same.
I can't even turn 1 side in the same colour in 4 seconds, so I don't even think about breaking that.

Grey - January 10, 2020, 10:15 am

I'm five minutes in and I haven't even been able to get one side done lmao

eGod - January 10, 2020, 10:17 am

(Jan 10, 2020 11:15 AM)Grey Wrote: [\[CITE\]](#) I'm five minutes in and I haven't even been able to get one side done lmao
It's hard haha.
Let me know if you get it solved!

I'll give it another try aswell

Clock - January 10, 2020, 10:45 am

I tried for about 2 minutes and came to the conclusion I indeed cannot solve a Rubik Cube.

Diamond - January 10, 2020, 11:15 am

It's an impressive game. However, it's not my strength. I did not attempt to finish solving the Rubik's cube.

NoSuchAgency - January 10, 2020, 11:40 am

This game would be cool if it worked properly on my phone and didn't try to change every thing when I touch the screen

Takehito Morokuzu - January 10, 2020, 12:26 pm

I have never been able to complete a rubik's cube. Although tbh I've never actually learned how to do it. I've been able to complete one side but never the whole thing.

SIM-4033767 - January 10, 2020, 1:26 pm

this is so anoyinggggg ive never solved one irl and doesn't seem like this is working either sooo ?

eGod - January 10, 2020, 1:31 pm

(Jan 10, 2020 02:26 PM)Seora ? Wrote: [\[CITE\]](#) this is so anoyinggggg ive never solved one irl and doesn't seem like this is working either sooo ?
Is the cube not working?
Or are you not able to solve this one either?
I'm confused

SIM-4033767 - January 10, 2020, 1:32 pm

(Jan 10, 2020 02:31 PM)Neal Caffrey \$\$ Wrote: [\[CITE\]](#) Is the cube not working?

hahaha I'm half asleep and like it's not turnin how i wantto and im dumb so ye ? i go zzz gn

grady - January 10, 2020, 1:36 pm

I can only solve one through muscle memory, so cant do it in this format

takes me ~2:30 though

Cooligan - January 10, 2020, 1:38 pm

Started playing, surpassed 10 minutes and thought I might be going somewhere with it, but nope I ended up just scrambling the thing.

This is why I can't stand rubix cubes lol.

Mullet Muscle - January 10, 2020, 7:12 pm

I lost patience and gave up 10 spins in
So I can't...

Nate - January 10, 2020, 7:15 pm

I can't even complete a real one in IRL

Kaybe - January 13, 2020, 12:37 am

<https://imgur.com/gallery/dQTIH6U>

This site made me lose a few brain cells

Michael - January 13, 2020, 12:44 am

Damn, I've always wanted to learn on how to solve these, but I never succeeded.

Mr. Robot - January 13, 2020, 2:08 am

Kinda laggy because rendering in blender right now

Snowwy - January 13, 2020, 2:11 am

Never ever done one. As in completed.

passCODE - January 13, 2020, 2:32 am

I can solve it in about a minute and 20 seconds, but this one on your website would take a bit longer. It's not that hard at all to solve a Rubik's cube, first two levels you solve in 30 seconds easily and then the last part is all about remembering the algorithm or reading it from the sheet of paper.

SIM-4398566 - January 13, 2020, 3:22 am

I've only ever solved a cube once. Never doing it again. Nice looking UI though.

Muggsy - January 13, 2020, 8:17 am

I now can say I do not know how to solve a rubiks cube and I am not even upset about it. Lol.

Dr. Einyel - January 13, 2020, 9:05 am

I have never tried. I wonder if there's people that could do this without doing a research about how to solve it.

SIM-4398566 - January 13, 2020, 1:33 pm

Came back and tried the game for 2 minutes and gave up. I hate these cubes.

Geass - January 14, 2020, 5:43 pm

I can't solve it from computer, uncomfortable, easy in my hands.

hayesh - January 15, 2020, 6:14 am

I can do one of these in about 2 seconds ?

Moxxi - January 15, 2020, 7:49 am

never solved one before after mixing one up

I know its just memorizing the moves and formulas and you can do it every time, I just cant be bothered to spend the effort doing that

Vitani's Mate - January 15, 2020, 7:52 am

I usually manage to get one side same color and that is it.
Then I just yell at it after some time.

Swizzer - January 15, 2020, 1:20 pm

2 mins i think was my record when i had the sequence down I can only remember the first two layers now.

chrisfx - January 19, 2020, 3:53 am

I'm at about 20 sec. avg. - 6 months ago I was at about a minute - Learned some now algs and exercising it every day.

MeganCult - January 19, 2020, 5:43 am

I used to love doing rubix as a young child but I just tried and I cant even complete it! strange

wiz - January 19, 2020, 10:01 am

If I tried really really hard, probably 30 years.

Fudge - January 20, 2020, 5:49 am

Been trying for 3years still can't get it

deadsh0t - January 20, 2020, 7:05 am

Dont know how to do it never learned it, there is a certain pattern and if you practice you will be able to solve it. without seeing it like a pattern you wont solve this because people (Like myself) are to focussed on the colors.

LoremIpsum - January 20, 2020, 7:06 am

(Jan 20, 2020 08:05 AM)deadsh0t Wrote: [\[CITE\]](#) Dont know how to do it never learned it, there is a certain pattern and if you practice you will be able to solve it. without seeing it like a pattern you wont solve this because people (Like myself) are to focussed on the colors.

I'm thinking the same way as you do. There is a video I posted at this thread of an Asian boy that completes one in 4.** seconds.

Incredible achievement I think, I can't even complete 1 row in 4 seconds.
