Thanks for mentioning your experience.

Yes, ESET with +110 millions customers worldwide is the most used security solution in the world.

+ I believe my prices are even better that what is being offered on eBay.

+ I can give you any amount you want.

+ I do give very good discounts for bulk purchases and reselleres. (+10 orders)

Thanks for giving us your review on ESET products.

That's correct. I'm using ESET for almost 10 years and I do also believe that It's one of the best, if not the best.

Here is the related info on my first post: <https://i.imgur.com/k0zitE4.png>

Do you know if the license is activated right away or can be used later when needed before the 365 day count day starts?

Thanks for your interest, mate.

Yes, I do believe that my prices are lower than almost anywhere in the world, including eBay.

To answer your question,

The license is already activated by ESET. So it's better to use them right away.

In another word, the clock is ticking for them!

No mate, Retail keys should be entered in the website.

My keys are OEM keys, which should be entered in the software.

Functionally wise, there is no difference between OEM and Retail keys.

Yet, ESET OEM keys are a better choice, price wise.

Lorem Ipsum - January 28, 2020, 1:32 pm

Lorem Ipsum's Review of the Service; "Genuine ESET Security Licenses - BEST Price & Quality GUARANTEED" by [AmazingLicense](#)

Communication:

A big thank you to start with. The communication between AmazingLicense and me went flawless.
I've spoke to him before, regarding the licenses and I must say he's a very professional guy.
Replies as soon as possible, is polite and pretty much straight forward. I don't feel like being rushed or pushed into buying anything and he doesn't feel the need to tell you how great his product is. This is a big deal in my eyes! Only confident sellers are aware of their quality and do not make anybody feel like they have to force any sales. Another positive thing I noticed is that AmazingLicense sends

the download link from the official ESET website, including the code, a video on how to use the ESET code and a way to contact him outside of HackForums for a smooth communication platform. I kept the communication on-site to benefit the HackForums review as much as possible. A very pleasant member to talk too. Thank you for this.

License Check:

Because I have a Mac, I asked for the "ESET Cyber Security Pro". The pro license should be different than the free version. This is including the network safety feature, which is a big plus for online browser and downloading of course. As well as the "keep the hackers away" feature. I'm not sure what this does exactly, as it's written in child friendly style, not in jargon or whatsoever. I can say with all honesty that the pro version is working. The license I have is recognised by ESET official website and program as 'paid' and as you can see here below. I have a GIF of the working license being activated until 2021. For those who feel the need to tell me that Mac doesn't need any anti-virus, I do not care. I wanted to check the license service firsthand before re-selling the licenses. I can say with all pleasure that this is achieved today and I'm happy to see members like AmazingLicense taking care of those who are in need of online protection.

Price:

The prices vary from \$2 up to \$6, depending on what kind of ESET program you need and of course for which device(s). My choice was simple, a Mac license to check out the service. I have to be clear about this, I didn't pay anything as I discussed my review service with AmazingLicense and asked for a price. He offered me a free license and I felt incredible lucky. I will make this clear, \$2 for Android up to \$6 for 'All Platforms' is incredible cheap. Especially when comparing prices with the official website of ESET. I didn't hesitate to pay AmazingLicense for his license code, but I couldn't decline the offer to get a free license for once. The prices of the licenses are incredible cheap and I already made a deal with another real life connect to re-sell the licenses after I tested them.

Long story short, the prices are incredible cheap for a license of this period with the quality of ESET.

Overall:

I had a great time talking to AmazingLicense, including the attitude of this member. Not many sellers are this kind, thoughtful and of course trusting me with a free license. I'm very happy to say that I will definitely do business with him again and I do not hesitate for a second to buy another service or product from AmazingLicense if he had more to offer. The license works, the program was easy to install and setup, including applying the code and adjusting settings as I preferred them to be. I highly recommend anybody that is looking for an anti-virus to check out the license service of AmazingLicense.

Thank you, once again, for this amazing service and of course thanks a lot for the free license.

Thank you for using my Review service and good luck with the sales!

Hi mate,

Thanks for sharing your experience.

Your keys were most probably Retail keys. My keys are OEM keys.

The only difference is that OEM keys give ~350 days activation period instead of 365.

Functionality wise, these is no difference.

Sure, I can give you a key for activating 4 Android devices.

How good is Eset in comparison to the usual market competitors? Like, jasper sky, bitdefender, Symantec?

acid2k1 - February 23, 2020, 2:18 pm

Can I get a MAC licence please?

Give me discount, thanks

Good question.

Here is the market share held by the leading Windows anti-malware application vendors worldwide, as of November 2019:

Hi mate,

1. Of course. You can use it to renew your license.
2. These are OEM licenses. You can't get support from ESET customer service. But you'll get support from me.
Most if not all the customers don't need any support. Installation and activation is very easy.
3. Yes. 1-Year/1-Device. But because they're OEM licenses, they give ~350 days activation period.

Let me know if you have anymore questions,
All the best.

Excellent service.

I paid the cheap price, received my license via e-mail immediately.

The OP has even attached a guide on how to download and install the AV.

It's guaranteed of course.

And in a VERY rare case if something happens, I'll replace ASAP.

But you shouldn't face any issue as you're purchasing a genuine license key.

Just know that I'm right beside you if anything happens. So purchase with peace of mind.

Perfect :)

This is my favorite Firewall/Antivirus and have been using it for over a decade. Prices have gone up, and they have really began cracking down on the trial accounts I used to use to get it for free. \$6 for a whole year is great without the headache of finding trials everytime it gets pulled.

Hi,

I am interested to become a reseller of Kaspersky and Eset products. I have some questions.

1. How long I can store these licenses?
2. Adding these license to ESET / Kaspersky account is possible or not?
3. Can I get an ESET / Kaspersky official invoice, if I buy large quantities?
4. The license key validity will start from the date of purchase? If yes, then my buyer activate the product after a week. That means he will get 7 days less validity?
5. If any of my buyer raise a refund request, can you revoke the subscription or block the key on my request basis?

Thank you.

ESET licenses are Global.

Kaspersky licenses can be for Europe or Global. The Europe version is a lot cheaper and you can activate it Globally with a simple VPN which I can provide for free as well. After activation VPN is not needed.

btw, for kaspersky the price is lower now. I'm preparing the new thread design with updated prices and more offeres from other antivirus companies.

Absolutely not. No info is being shared, it's only the device name and it's only for management of the license in case you want to move the license to another device.

For features like Parental control or Anti-Theft, after activating them through the software, they can only be link to your own account.

All the security benefit for you as the customer is in the software, not in the website.

Yes, ESET Nod32 Antivirus is mainly just an Antivirus and should be the one you need. You can read more about it on the official website.

btw, this version doesn't have firewall. I recommend to install the Internet Security version (which has firewall and more) and disable the features you don't need.

No vouch copy is available.

I use and recommend ESET due to its overall quality and the competitive prices I offer.
Free antiviruses don't match the level of premium versions, especially when compared to ESET's premium software.

ESET (and most other antivirus providers) offers a 30-day trial with all the premium features. You just need an email address to get the trial.
You can visit the ESET website to download the official version, or you can visit my store where official download links are provided on the product pages.

After the trial period, if you're satisfied, you can purchase the premium version, and I'd appreciate it if you choose to purchase from my website.

I can offer that version, but the price is quite high. If you're interested, please let me know.

At the moment, the license available on the website for \$6.99 can activate any of the following versions—your choice:

ESET Home Security Essential (Windows, Mac, Android)

ESET Internet Security (Windows)

ESET NOD32 Antivirus (Windows)

ESET Cyber Security Pro (Mac)

ESET Mobile Security (Android)

ESET Parental Control (Android)

ESET Smart TV Security (Android)

I have a few questions.

Do you need to register an account to use the software?

What happens after 1 year? Will it ask to pay ESET directly and will I be able to use another license key without any trouble?

Regards

RegardsHi,

No account is needed. Simply insert the license key into the ESET software to activate it. When the license expires, the software will stop working. You can then purchase a new license and activate it again.

The renewal process is very simple and only takes a few seconds — it's just like the initial activation, but this time it renews the software.

I purchased a 1 year license about 5 months ago, and it expired due to too many users having the same key. Great service for the duration it was all working.

AmazingLicense - April 20, 2026, 5:07 am

Hi,
Hope you're doing well.

I haven't been active on the forum for a while, but the website and support channels (website contact form, Telegram, and Discord) have been available and could be used to receive support (both pre- and post-purchase).

From now on, I'll be active on the forum as well.

The website has been and still is fully operational. You can purchase through the website with instant delivery.

(Mar 3, 2026 05:01 PM)georgieboy Wrote: [\[CITE\]](#) I purchased a 1 year license about 5 months ago, and it expired due to too many users having the same key. Great service for the duration it was all working.
I'm very sorry about this very rare issue.
This should not happen, as all licenses are genuine and guaranteed to work until their expiration date.

You mentioned that you purchased through the website. Did you contact me via the website's contact form, Telegram, or Discord (links are available in my profile)?

If so, I'm confident that I would have either provided a replacement or issued a refund. However, I don't recall receiving a support request regarding this issue in recent months.

You did send me a private message two days before posting on my thread, but you didn't include your order ID. Also, since I wasn't active on the forum, it would have been much more effective to reach me through the support channels listed on my profile or website.

In any case, I'll reply to your PM and try to locate your order in the system to contact you via email if possible.

I'm ready to provide you with either a new 1-year license key or a refund — whichever you prefer.

Kind regards,
Raymond
