Telegram Group Scraper

| Install In Termux | No Root Required |

What is a telegram group scraper?

Telegram Scraper Can Collect All User Information From A Group & Saves It To members.csv.

You can use this in any way you want like promote something with bulk sms to all , or add them all to group ("add2group.py" is still in development i will complete it before 10 December)

Begin by watching the video.

Important: the tool used in the video is version 1, but you should download version 3 (latest at the moment) on [Github](#).

See the [#How to install and use](#) section on Github.

[Video: <https://youtu.be/l8oR9tuYyrU>]

API setup

Go to <http://my.telegram.org> and log in.

Click on API development tools and fill the required fields.

put app name you want & select other in platform Example :

copy "api_id" & "api_hash" after clicking create app (will be used in setup.py)

How to install and use

```
$ pkg install -y git python
```

```
$ git clone https://github.com/th3unkn0n/TeleGram-Scraper.git
```

```
$ cd TeleGram-Scraper
```

Install requirements

```
$ python3 setup.py -i
```

Setup configuration file (apiID, apiHASH)

```
$ python3 setup.py -c
```

To generate user data
\$ python3 scrapr.py

(members.csv is default if you changed name use it)
Send Bulk sms To Collected Data
\$ python3 smsbot.py members.csv

Add users to your group (in development)
\$ python3 add2group.py members.csv

Update tool
\$ python3 add2group.py members.csv

?

Nice tutorial, good to know about this app.
Although the topic title is a bit misleading.
