Thread: [Need WooCommerce plugin finished \(70% done\)](#)

Gleeshy - January 16, 2020, 6:51 am

Coder that was working on it didn't come online. He was working on a scraper plugin for WooCommerce, it's finished for 70%. I need someone who can finish the last 30%.

The scraper imports products from an existing webshop (not aliexpress) and adds it to our webshop.

How plugin works:

Step 1 - scrapes all productcategories on that webshop

Step 2 - in our plugin, those categories will show so i can select a productcategory to import products from

Step 3 - once i selected the category, the products will show in a list

Step 4 - i can set new/our price for each product and then i will import that product, products are scraped on the background so i can import multiple products at the same time which will be added to our webshop on the background

Pm me your discord/telegram
