- No you do not need any knowledge, everything will be explained and if you have any questions you will be able to ask for my support.

- How much time would it take me to buy and sell ?

Hello Everyone,

The OP send me the method and below is my review.

To start this method is gray hat. It's pretty simple and I've seen similar methods in the past. This does involve reselling. The OP gives you resources to help stay in stock at all times so you can maximize your cash flow. You will need to have an investment of at least \$30-50 BTC to begin. This can be pretty scalable however I see potential risk involved since there's a couple of moving parts.

In conclusion this method is pretty public however the biggest leg up is the OP gives you resources to make sure you can stay in stock.

Please note I am in no way affiliated with the OP.

Thanks for you review man ?

However i dont really get the part of the "potential risk" ?

Because i can say there is no risk of getting in trouble doing that if you follow my Whole steps

Hello ! for sure man, about what do you need more info ?

The Basic of the method is about buying a product (Digital) with Bitcoin and then sell it for profit quickly for Bitcoin. Repeat the same process again and again, the highest product you buy (always the same one but the value's can change) the highest profit you will make.

if you need more info about something just let me know !
